Albumin Globulin Thrombin Hemoglobin. 6. A nurse must establish and maintain an airway in a client who has experienced a near-drowning in the ocean.

As may be obvious from its name, one of the major functions of connective tissue is to connect tissues and organs. Unlike epithelial tissue, which is composed of cells closely packed with little or no extracellular space in between, connective tissue cells are dispersed in a matrix. The matrix usually includes a large amount of extracellular material produced by the connective tissue cells that ...
