Sixteen countries across the world — including the United States and many European nations — have fallen into economic crises since the late 1990s. In The Limits of Fiscal, Monetary, and Trade Policies: International Comparisons and Solutions, Jonathan E Leightner convincingly argues that the fundamental cause of the global malaise is a surplus of savings. He provides compelling evidence (via statistical estimates) that fiscal, monetary, and trade policies cannot solve the resulting problems since their effectiveness has plummeted. Leightner also shows that the solution to the current global economic woes is a “consumption driven growth model” (which China advocates but has yet to fully implement) because when there is insufficient consumption, excess savings will remain idle, seek a return from rent or deception, or fund speculative bubbles.

International Economics McGraw-Hill/Irwin Written form 1957 through 1978 by one of the foremost authorities in the field of international economics, this collection of Peter Kenen's previously published essays deals with issues in the pure theory of international trade, international monetary theory, and international monetary reform. The essays in Part I, "Trade, Tariffs, and Welfare," concern the roles of tangible and human capital in the determination of trade patterns, the joint determination of demand conditions and trade patterns, the gains from international trade, and the effects of migration on economic welfare. Part II, "International Monetary Theory and Policy," contains essays on the theory of gold-exchange standard, the determination of forward exchange rates, the demand for international reserves, economic integration and the delineation of currency areas, and the process of balance of payments adjustment under pegged and floating exchange rates. The essays in Part III, "Monetary Reform and the Dollar," are arranged in chronological order, from 1963 through 1977, and focus on the problems and progress of international monetary reform and on the functioning of the present international
