LIC Assistant Prelims Practice Set 2021: Attempt Latest PDF Here! Disha Publications

An introductory textbook exploring the subject of Lagrangian and Hamiltonian dynamics, with a relaxed and self-contained setting. Lagrangian and Hamiltonian dynamics is the continuation of Newton's classical physics into new formalisms, each highlighting novel aspects of mechanics that gradually build in complexity to form the basis for almost all of theoretical physics. Lagrangian and Hamiltonian dynamics also acts as a gateway to more abstract concepts routed in differential geometry and field theories and can be used to introduce these subject areas to newcomers. Journeying in a self-contained manner from the very basics, through the fundamentals and onwards to the cutting edge of the subject, along the way the reader is supported by all the necessary background mathematics, fully worked examples, thoughtful and vibrant illustrations as well

as an informal narrative and numerous fresh, modern and inter-disciplinary applications. The book contains some unusual topics for a classical mechanics textbook. Most notable examples include the 'classical wavefunction', Koopman-von Neumann theory, classical density functional theories, the 'vakonomic' variational principle for non-holonomic constraints, the Gibbs-Appell equations, classical path integrals, Nambu brackets and the full framing of mechanics in the language of differential geometry.

Communicating Across
Cultures is an innovative
short course for learners of
business English who want

to function effectively in an international environment by developing their intercultural skills in English. Drawing on inspirational advice from leading figures in the world of cross-cultural communication, *Communicating Across Cultures* covers all types of oral and written communication, from meetings to negotiations, telephone calls to emails, and deals with situations ranging from working in international teams to managing conflict. Students are invited to analyse their own intercultural competence and helped to develop a personal action plan for further use beyond the classroom. The Student's Book comes with an audio CD that contains authentic interviews with people from the world of business and

extracts from meetings that exemplify the communication strategies presented.

Lakhmir Singh 's Science is a series of books which conforms to the NCERT syllabus. The main aim of writing this series is to help students understand difficult scientific concepts in a simple manner in easy language. The ebook version does not contain CD.

(FREE SAMPLE) Study Package for Indian Air Force Airmen Group X & Y (Technical & Non Technical Trades) Exam with 3 Online Sets Bloomsbury Publishing

The public debate is rife with polarized views of how to deliver essential services such as education, health, and security. While some tout privatization as a way to supplant bad governments, others warn that private firms maximize profits at the expense of socially oriented service attributes. In reality, all forms of service delivery—public, private and hybrid public private-collaborations—have merits and flaws. This book scrutinizes the menu of delivery forms in public services and the conditions that should make them work. It argues that privatization benefits from capable government units committing to well-defined policy objectives, mobilizing critical resources, and incentivizing effective and inclusive delivery. Societies

counting on capable governments can also reject single solutions and experiment with plural paths of improvement, where public and private organizations co-exist and learn from each other. This book will appeal to students, academics, managers and policy makers interested in examining the public-private boundary and the many ramifications of this focal issue.

Politics: Who Gets What, When, How, which was first published in 1936, is the classic analysis of power and manipulation by ruling elites and counter-elites.

The themes that occur throughout this essay have become the guideposts for most modern research in techniques of propaganda and political organization. “ It is unquestionably one of the most influential treatments of politics published in this century. ” —David B. Truman, Prof.of Public Law and Government, Columbia University “ This book is a landmark of modern political science. ” —Daniel Lerner, Professor of Sociology, M.I.T.

“ For over three decades the students of politics have had their intellectual horizons constantly broadened by Harold Lasswell. There is probably no man in American political science who has brought to bear as many new approaches to the analysis of political behaviour as he has. There is perhaps no better way

to get the essence of Lasswell ’ s thought than in his book, Politics: Who Gets What, When, How. ” —Seymour Martin Lipset, Department of Sociology, U.C. Berkeley
