“ Readers curious about the making of Renaissance art, its cast of characters and political intrigue, will find much to relish in these pages. ” —Wall Street Journal

Giorgio Vasari (1511 – 1574) was a man of many talents—a sculptor, painter, architect, writer, and scholar—but he is best known for *Lives of the Artists*, which singlehandedly established the canon of Italian Renaissance art. Before Vasari's extraordinary book, art was considered a technical skill, and artists were mere decorators and craftsmen. It was through Vasari's visionary writings that Raphael, Leonardo, and Michelangelo came to be regarded as great masters of life as well as art, their creative genius celebrated as a divine gift. Lauded by Sarah Bakewell as “ insightful, gripping, and thoroughly enjoyable, ” *The Collector of Lives* reveals how one Renaissance scholar completely redefined how we look at art.

A riveting account of the Saint Bartholomew's Day Massacre, its origins, and its aftermath, this volume by Barbara B. Diefendorf introduces students to the most notorious episode in France's sixteenth century civil and religious wars and an event of lasting historical importance. The murder of thousands of French Protestants by Catholics in August 1572 influenced not only the subsequent course of France's civil wars and state building, but also patterns of international alliance and long-

standing cultural values across Europe. The book begins with an introduction that explores the political and religious context for the massacre and traces the course of the massacre and its aftermath. The featured documents offer a rich array of sources on the conflict — including royal edicts, popular songs, polemics, eyewitness accounts, memoirs, paintings, and engravings — to enable students to explore the massacre, the nature of church-state relations, the moral responsibility of secular and religious authorities, and the origins and consequences of religious persecution and intolerance in this period. Useful pedagogic aids include headnotes and gloss notes to the documents, a list of major figures, a chronology of key events, questions for consideration, a selected bibliography, and an index. The Civilisation of the Period of the Renaissance in Italy Princeton Review

A "lively and engaging" history of the Middle Ages (Dallas Morning News) from the acclaimed historian William Manchester, author of *The Last Lion*. From tales of chivalrous knights to the barbarity of trial by ordeal, no era has been a greater source of awe, horror, and wonder than the Middle Ages. In handsomely crafted prose, and with the grace and authority of his extraordinary gift for narrative history, William Manchester leads us from a civilization tottering on the brink of collapse to the grandeur of its rebirth: the dense explosion of energy that spawned some of

history's greatest poets, philosophers, painters, adventurers, and reformers, as well as some of its most spectacular villains.

"Manchester provides easy access to a fascinating age when our modern mentality was just being born."
--Chicago Tribune

This highly original book opens up the almost entirely neglected area of the black African presence in Western Europe during the Renaissance. Covering history, literature, art history and anthropology, it investigates a whole range of black African experience and representation across Renaissance Europe, from various types of slavery to black musicians and dancers, from real and symbolic Africans at court to the views of the Catholic Church, and from writers of African descent to Black African criminality. Their findings demonstrate the variety and complexity of black African life in fifteenth and sixteenth-century Europe, and how it was affected by firmly held preconceptions relating to the African continent and its inhabitants, reinforced by Renaissance ideas and conditions. Of enormous importance both for European and American history, this book mixes empirical material and theoretical approaches, and addresses such issues as stereotypes, changing black African

identity, and cultural representation in art and literature.

A history of Western philosophy is a progressive story of the best answers to the most interesting and important questions we have asked in our attempts to understand the world and our experience in it from the beginning of our time on Earth. Examples of such questions are: What can we know, and how can we come to know it? What is the fundamental nature of our world and ourselves? How can we best live and organise our individual and collective lives most satisfyingly and happily? From early childhood to very old age we all ask philosophical questions because we feel the need to understand our human situation and condition. This history is divided into 11 major Parts presented in 7 separate Books, covering the main developments in science and philosophy over the past 2,500 years. During this time, some radically different schools of thought have emerged, all integrally related to the history of the times, societies and cultures from which they arose. Book 1: From Ancient Greece and Rome to the Renaissance: Part 1: Ancient Philosophy: Greek

and Roman Interpretations of the World: Throughout the whole period from the ancient Greek city-States in the 6th and 5th centuries B.C.E to the fall of the Roman Empire, the Greek interpretation of the world was predominant and it has strongly influenced Western culture ever since. In the Roman Empire, controlling and governing the world became more important than understanding it, so the major schools of philosophy were primarily concerned with ways of coping with a changing and more hostile environment by attempting to gain consolation and achieve inner individual peace. Part 2: From the Classical Era to the Renaissance: Medieval Philosophy: Following the rise of Christianity, medieval philosophy was dominated by the Church for many centuries during which the leading scholars were priests whose powers of reason were almost exclusively devoted to attempting to prove the existence of God.

In this enchanting and darkly imaginative debut novel full of myth, magic, romance, and mystery, a Princeton freshman is drawn into a love triangle with two enigmatic brothers, and discovers terrifying secrets about her family and herself—a

bewitching blend of *Twilight*, *The Secret History*, *Jane Eyre*, and *A Discovery of Witches*. Arriving at Princeton for her freshman year, Thea Slavin finds herself alone, a stranger in a strange land. Away from her family and her Eastern European homeland for the first time, she struggles to adapt to unfamiliar American ways and the challenges of college life—including an enigmatic young man whose brooding good looks and murky past intrigue her. Falling into a romantic entanglement with Rhys and his equally handsome and mysterious brother, Jake, soon draws Thea into a sensual mythic underworld as irresistible as it is dangerous. In this shadow world that seems to mimic Greek mythology and the Bulgarian legends of the Samodivi or “wildalones”—forest witches who beguile and entrap men—she will discover a shocking secret that threatens everything she holds dear. And when the terrifying truth about her own family is revealed, it will transform her forever . . . if she falls under its spell. Mesmerizing and addictive, *The Wildalone* is a thrilling blend of the modern and the fantastic. The creator of the hit podcast series *Tides of History* and *Fall of Rome* explores the four explosive decades between 1490 and 1530, bringing to life the dramatic and deeply human story of how the West was reborn. In the bestselling tradition of *The Swerve* and *A Distant Mirror*, *The Verge* tells the story of a period that marked a decisive turning point for both European and world history. Here, author Patrick Wyman examines two complementary and contradictory sides of the same historical coin: the world-altering implications of the developments of printed mass media, extreme taxation, exploitative globalization, humanistic learning, gunpowder warfare, and mass religious conflict in the long term, and their intensely disruptive consequences in the short-term. As told through the lives of ten

real people--from famous figures like Christopher Columbus and wealthy banker Jakob Fugger to a ruthless small-time merchant and a one-armed mercenary captain--The Verge illustrates how their lives, and the times in which they lived, set the stage for an unprecedented globalized future. Over an intense forty-year period, the seeds for the so-called "Great Divergence" between Western Europe and the rest of the globe would be planted. From Columbus's voyage across the Atlantic to Martin Luther's sparking the Protestant Reformation, the foundations of our own, recognizably modern world came into being. For the past 500 years, historians, economists, and the policy-oriented have argued which of these individual developments best explains the West's rise from backwater periphery to global dominance. As The Verge presents it, however, the answer is far more nuanced.
