Teacher Answer Key ****NO VERSION/RANDOM**** 4 1. Base your answer on the information below and accompanying graph and on your knowledge of biology. Students were asked to design a lab that investigated the relationship between exercise and heart rate. Heart rate was determined by recording the pulse rate in beats per minute.

This lab allows students to become familiar with fundamental skills and biotechnological investigation. Restriction endonucleases and gel electrophoresis are used to analyze DNA sequences by creating "fingerprints". The DNA can be analyzed to find out genetic information about ourselves.
