Fluorescence methods are being used increasingly in biochemical, medical, and chemical research. This is because of the inherent sensitivity of this technique. and the favorable time scale of the phenomenon of fluorescence. 8 Fluorescence emission occurs about 10- sec (10 nsec) after light absorp tion. During this period of time a wide range of molecular processes can occur,

and these can effect the spectral characteristics of the fluorescent compound. This combination of sensitivity and a favorable time scale allows fluorescence methods to be generally useful for studies of proteins and membranes and their interactions with other macromolecules. This book describes the fundamental aspects of fluorescence. and the biochemical applications of this methodology. Each chapter starts with the -theoreticalbasis of each phenomenon of fluorescence, followed by examples which illustrate the use of the phenomenon in the study of biochemical problems. The book contains numerous figures. It is felt that such graphical presentations contribute to pleasurable reading and increased understand ing. Separate chapters are devoted to fluorescence polarization, lifetimes, quenching, energy transfer, solvent effects, and excited state reactions. To enhance the usefulness of this work as a textbook, problems are included which illustrate the concepts described in each chapter. Furthermore, a separate chapter is devoted to the instrumentation used in fluorescence spectroscopy. This chapter will be

especially valuable for those perform ing or contemplating fluorescence measurements. Such measurements are easily compromised by failure to consider a number of simple principles.

Teaching Social Studies to English Language Learners provides readers with a comprehensive understanding of both the challenges that face English language learners (ELLs) and ways in which educators might address them in the social studies classroom. The authors offer context-specific strategies for the full range of the social studies curriculum, including geography, U.S. history, world history, economics, and government. These practical instructional strategies will effectively engage learners and can be incorporated as a regular part of instruction in any classroom. An annotated list of web and print resources completes the volume, making this a valuable reference to help social studies teachers meet the challenges of including all learners in effective instruction. Features and updates to this new edition include: • An updated and streamlined Part 1 provides an essential overview of ELL theory in a social studies specific-context. • "Teaching Tips" offer helpful suggestions and ideas for creating and modifying lesson plans to be inclusive of ELLs. • Additional practical examples and new pedagogical elements in Part 3 include more visuals, suggestions for harnessing new technologies, discussion questions, and reflection points. • New material that takes into account the demands of the Common Core State Standards, as well as updates to the web and print resources in Part 4.

Volumes in Writing Spaces: Readings on Writing offer multiple perspectives on a wide-range of topics about writing, much like the model made famous by Wendy Bishop ' s " The Subject Is

. " series. In each chapter, authors present their unique views, insights, and strategies for writing by addressing the undergraduate reader directly. Drawing on their own experiences, these teachers-as-writers invite students to join in the larger conversation about developing nearly every aspect of craft of writing. Consequently, each essay functions as a standalone text that can easily complement other selected readings in writing or writing-intensive courses across the disciplines at any level. Topics in Volume 1 of the series include academic writing, how to interpret writing assignments, motives for writing, rhetorical analysis, revision, invention, writing centers, argumentation, narrative, reflective writing, Wikipedia, patchwriting, collaboration, and genres.

This first-ever Surgeon General's Report on bone health and osteoporosis illustrates the large burden that bone disease places on our Nation and its citizens. Like other chronic diseases that disproportionately affect the elderly, the prevalence of bone disease and fractures is projected to increase markedly as the population ages. If these predictions come true, bone disease and fractures will have a tremendous negative impact on the future well-being of Americans. But as this report makes clear, they need not come true: by working together we can change the picture of aging in America. Osteoporosis, fractures, and other chronic diseases no longer should be thought of as an inevitable part of growing old. By focusing on prevention and lifestyle changes, including physical activity and nutrition, as well as early diagnosis and appropriate treatment, Americans can avoid much of the damaging impact of bone disease and other chronic diseases. This Surgeon General's Report brings together for the first time the scientific evidence related to the prevention, assessment, diagnosis, and treatment of bone disease. More

importantly, it provides a framework for moving forward. The report will be another effective tool in educating Americans about how they can promote bone health throughout their lives. This first-ever Surgeon General's Report on bone health and osteoporosis provides much needed information on bone health, an often overlooked aspect of physical health. This report follows in the tradition of previous Surgeon Generals' reports by identifying the relevant scientific data, rigorously evaluating and summarizing the evidence, and determining conclusions.

The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options.

Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows

from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site The Professor is In, she has helped countless Ph.D. 's turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish -Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right The Professor Is In addresses all of these issues, and many more.

Passionate Curiosities explores the collections held in the University of Michigan's Kelsey Museum of Archaeology through the lens of the people whose intellectual interests, financial backing, and social networks brought artifacts to Ann Arbor from the 1880s to the 1990s. Through purchases and expeditions, these individuals shaped the Museum's internationally recognized antiquities from the ancient civilizations of Greece, Rome, North Africa, Egypt, and the Near East, extensive photographic documentation of these regions from the early 1900s, and significant assemblages of early Christian and Islamic visual culture. An intriguing array of personalities--from archaeologists, missionaries, and diplomats to industrialists, bankrollers, and inventors--weave through these pages. They include Ernst Herzfeld, the eminent Orientalist who helped forge antiquities legislation in Iran; Luigi Cesnola, the rapacious harvester of Cypriot sites; Esther Van Deman, the pioneering feminist and scholar of Roman construction techniques; and Samuel Goudsmit, the renowned nuclear physicist and avid Egyptologist.

World-famous dealers who established standards in antiquities connoisseurship likewise populate these sagas. Readers will encounter Edgar J. Banks, a swashbuckling purveyor of Mesopotamian antiquities and entrepreneur of biblical documentary films; Maurice Nahman, the "Lion of Cairo"; and the colorful members of the Tano dealer dynasty in Egypt. This copiously illustrated book will interest general readers as well as scholars curious about the holdings of the Kelsey, early collectors and dealers, and the history of museums.

Providing perspectives from a range of experts, including international lawyers, political scientists, and practitioners, this book assesses current theory and practice of economic sanctions, discussing current legal and political challenges faced by the international community. It examines both the implementation of sanctions by major powers – the United States, the European Union, and Japan – as well as assessing the impact of those sanctions through case studies of Russia, Iran, Syria, and North Korea. Balancing theoretical analysis of legal considerations with national and regional level empirical analysis, it also includes coverage of sanctions issues by the UN Security Council and the EU, as well as the extraterritorial application of sanctions. A valuable reference for academics and practitioners, *Economic Sanctions in International Law and Practice* will be useful to those working in the fields of international law, diplomacy, and international political economy.

Communication Research Methods in Postmodern Culture explores communication research from a postmodern perspective while retaining key qualitative and quantitative research methods. The author uses easy-to-understand language to incorporate new research methods inspired by contemporary culture and includes review questions and suggested activities designed to help readers understand and master communication research. The blend of new and traditional methods creates a book appropriate to the study of communication in an increasingly complex cultural environment.

Community Psychology, CourseSmart Solutions eTextbook for Rasmussen/Ambassador Springer Science & Business Media Karanis, a town in Egypt's Fayum region founded around 250 BC, housed a farming community with a diverse population and a complex material culture that lasted for hundreds of years. Ultimately abandoned and partly covered by the encroaching desert, Karanis eventually proved to be an extraordinarily rich archaeological site, yielding tens of thousands of artifacts and texts on papyrus that provide a wealth of information about daily life in the Roman-period Egyptian town. This volume tells of the history and culture of Karanis, and also provides a useful introduction to the University of Michigan's excavations between 1924 and 1935 and to the artifacts, archival records and photographs of the excavation that now form one of the major components of the collection of the Kelsey Museum of Archaeology.

A classic treatise on international maritime law. Originally published: New York: Oxford University Press, 1916. xv, (xiv-xv, 79 pp. paged in duplicate (158 pp.)), 81-83 pp. (total 182 pp.) A translation of Grotius's Mare Liberum, with Latin and English on facing pages. This groundbreaking work was commissioned by the Dutch East India Company to dispute the monopoly on East Indian trade routes claimed by the Portuguese. It argues that the seas are international territory open to all nations, thus rejecting the idea that any area of the seas could belong to a country. An instant classic, it received a great deal of attention when it was published in 1609. Perhaps the most important reply is John Selden's Mare Clausum (1635), which defends British claims to sovereignty over the coastal waters of the British Isles.

Decades of research have demonstrated that the parent-child dyad and the environment of the family â €"which includes all primary

caregivers â €"are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8;

universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.
