### Think-Aloud Protocols in Second Language Writing Princeton Review

This book addresses the validity of think-aloud protocols (TAPs) in L2 writing research through a mixed methods study and proposes effective approaches for their valid implementation. The book uncovers the reactive effects that TAPs have on L2 writing performance and processes, and examines how individual factors moderate this reactivity. It further presents and categorizes participants' perceptions regarding reactivity and veridicality. To enhance veridicality, the book identifies incomplete TAPs using

---

retrospective verbal reports as a reference point. Recommendations for utilizing TAPs include considering participants' individual differences, recent experiences, and emotions. This book will be valuable to educators teaching methodology in second or foreign language education, applied linguistics, or writing research, and to L2 researchers or graduate students with a broad interest in research methods, process-based research, or writing studies, or planning to incorporate TAPs into their research.

#### Simplify Your Study Princeton Review

This is the first BMAT theory and practice book on the market, providing not only practice questions but breaking down the BMAT exam step-by-step. The authors, both leading specialists in BMAT training, focus on each section in turn, using many sample questions to carefully illustrate the theory rather than simply testing rote learning. A concluding mock exam allows candidates to consolidate learning through self-assessment, with model answers to refer to at the end.
