The day before Christmas, snuggled on his floor, Bear sleeps soundly with a great big snore. "Dear Bear. Get up!" Mouse shouts in

his ear. "We won't let you sleep through Christmas this year." Bear's friends are determined that he's awake for Christmas and they get him up from his hibernation on Christmas Eve. Bear is excited to experience the holiday with his friends and tries very hard to stay awake, helping to find the right Christmas tree, making mint tea and singing carols. Finally, though, it's his friends who have fallen asleep - and Bear Stays Up! He makes food and presents for his friends, not noticing that Father Christmas has also come to visit. Christmas morning dawns bright and happy for all!

**Evidence-based Medicine** Oxford University Press  
Children with specific language impairment (SLI) show a significant deficit in spoken language that cannot be attributed to neurological damage, hearing impairment, or intellectual disability. More prevalent than autism and at least as prevalent as dyslexia, SLI affects approximately seven percent of all children; it is longstanding, with adverse effects on academic, social, and (eventually) economic standing. The first edition of this work established Children with Specific Language Impairment as the landmark reference on this condition, considering not only the disorder's history, possible origins, and treatment but also what SLI might tell us about language organization and development in general. This second edition

---

offers a complete update of the earlier volume. Much of the second edition is completely new, reflecting findings and interpretations based on the hundreds of studies that have appeared since the publication of the first edition in 1997. Topics include linguistic details (descriptive and theoretical), word and sentence processing findings, genetics, neurobiology, treatment, and comparisons to such conditions as autism spectrum disorders, ADHD, and dyslexia. The book covers SLI in children who speak a wide range of languages, and, although the emphasis is on children, it also includes studies of adults who were diagnosed with SLI as children or are the parents of children with SLI. Written by a leading scholar in the field, *Children with Specific Language Impairment* offers the most comprehensive, balanced, and unified treatment of SLI available.

this New York Times bestselling series. Look for the hidden image on every page! Have you ever built a snowman and discovered the next day that his grin has gotten a little crooked, or his tree-branch arms have moved? And you've wondered . . . what do snowmen do when we're not watching? After an early snowfall, a few kids build some snowmen before going trick-or-treating. And when the kids go off to bed, the snowmen have their own Halloween festival! There's candy and apple-bobbing and costume contests and all sorts of autumn activities. When the kids wake up the next morning, the snowmen are gone . . . but they've left a very special message behind.

I Went Walking Harper Collins

The perfect picture book for the holiday, this hilarious twist on the traditional Thanksgiving feast features Turkey as he hops from hiding place to hiding place to avoid ending up as the main course. With Thanksgiving only one day away, can Turkey find a place to hide from the farmer who's looking for a plump bird for his family feast? Maybe he can hide with the pigs . . . or the ducks . . . or the horses . . . Uh-oh! Here comes the farmer! Run, Turkey, run!
