Here is a book as joyous and painful, as mysterious and memorable, as childhood itself. I Know Why the Caged Bird Sings captures the longing of lonely children, the brute insult of bigotry, and the wonder of words that can make the world right. Maya Angelou's debut memoir is a modern American classic beloved worldwide. Sent by their mother to live with their devout, self-sufficient grandmother in a small Southern town, Maya and her brother, Bailey, endure the ache of abandonment and the prejudice of the local "powhitetrash." At eight years old and back at her mother's side in St. Louis, Maya is attacked by a man many times her age—and has to live with the consequences for a lifetime. Years later, in San Francisco, Maya learns that love for herself, the kindness of others, her own strong spirit, and the ideas of great authors ("I met and fell in love with William Shakespeare") will allow her to be free instead of imprisoned. Poetic and powerful, I Know Why the Caged Bird Sings will touch hearts and change minds for as long as people read. "I Know Why the Caged Bird Sings liberates the reader into life simply because Maya Angelou confronts her own life with such a moving wonder, such a luminous dignity."—James Baldwin From the Paperback edition.

Taken from "The Talented Tenth" written by W. E. B. Du Bois: The Negro race, like all races, is going to be saved by its exceptional men. The problem of education, then, among Negroes must first of all deal with the Talented Tenth; it is the problem of developing the Best of this race that they may guide the Mass away from the contamination and death of the Worst, in their own and other races. Now the training of men is a difficult and intricate task. Its technique is a matter for educational experts, but its object is for the vision of seers. If we make money the object of man-training, we shall develop money-makers but not necessarily men; if we make technical skill the object of education, we may possess artisans but not, in nature, men. Men we shall have only as we make manhood the object of the work of the schools-intelligence, broad sympathy, knowledge of the world that was and is, and of the relation of men to it-this is the curriculum of that Higher Education which must underlie true life. On this foundation we may build bread winning, skill of hand and quickness of brain, with never a fear lest the child and man mistake the means of living for the object of life.

Stories of Useful Inventions HarperCollins UK

Among the most controversial of Nazi publications was a book for children, published in 1938 under the title *Der Giftpilz*—or, *The Poisonous Mushroom*. Here, the Jewish threat to German society was portrayed in the most simplistic and elemental terms. The author, Ernst Hiemer, put together 17 short vignettes or morality stories intended to warn children of the dangers posed by Jews. Jews were depicted as conniving, thieving, treacherous liars who would do anything for personal gain. 'Avoid Jews at all costs,' was Hiemer's underlying message. Though aimed at children aged roughly 8 to 14, Hiemer's lessons were intended for all readers—older siblings, parents, and grandparents. Following Hitler's lead, and not without justification, Jews were presented as a profound threat to German society; they had to be shunned and ultimately removed from the nation, if the German people were to flourish. Long out of circulation, and banned in Germany and elsewhere, this new edition reproduces a work of historical importance—including full color artwork by German cartoonist Philipp Rupprecht ("Fips"). The book was repeatedly cited at the Nuremberg Trials as evidence of 'Nazi cruelty', and was used by prosecutors to justify a death sentence for its publisher, Julius Streicher. If only for the sake of history, the reading public should have access to one of the more intriguing and notorious publications of the Third Reich.

This lecture by Mott, delivered 17 December 1849, was in response to one by an unidentified lecturer criticizing the demand for equal rights for women. She makes a very gentle appeal, here, for women's enfranchisement, placing emphasis, instead on the injustices done to women in marriage.

Eloquent, practical and wise, this book by one of the world's most important scientists—and two time Pulitzer Prize winner—should be read and studied by anyone concerned with the fate of the natural world. It "makes one thing clear ... we know what we do, and we have a choice" (The New York Times Book Review). E.O. Wilson assesses the precarious state of our environment, examining the mass extinctions occurring in our time and the natural treasures we are about to lose forever. Yet, rather than eschewing doomsday prophecies, he spells out a specific plan to save our world while there is still time. His vision is a hopeful one, as economically sound as it is environmentally necessary.

I Know Why the Caged Bird Sings Goodheart-Wilcox Publisher

Praise for Liberating Learning "Moe and Chubb have delivered a truly stunning book, rich with the prospect of how technology is already revolutionizing learning in communities from Midland, Pennsylvania to Gurgaon, India. At the same time, this is a sobering telling of the realpolitik of education, a battle in which the status quo is well defended. But most of all, this book is a call to action, a call to unleash the power of technological innovation to create an education system worthy of our aspirations and our children's dreams." Ted Mitchell, CEO of the New Schools Venture Fund "As long as we continue to educate students without regard for the way the real world works, we will continue to limit their choices. In Liberating Learning, Terry Moe and John Chubb push us to ask the questions we should be asking, to have the hard conversations about how far technology can go to advance student achievement in this country." Michelle Rhee, Chancellor of Education for the Washington, D.C. schools "A brilliant analysis of how technology is destined to transform America's schools for the better: not simply by generating new ways of learning, but also and surprisingly by unleashing forces that weaken its political

opponents and open up the political process to educational change. A provocative, entirely novel vision of the future of American education." Rick Hanushek, the Paul and Jean Hanna Senior Fellow at the Hoover Institution, Stanford University "Terry Moe and John Chubb, two long-time, astute observers of educational reform, see technology as the way to reverse decades of failed efforts. Technology will facilitate significantly more individualized student learning and perhaps most importantly, technology will make it harder and harder for the entrenched adult interests to block the reforms that are right for our kids. This is a provocative, informative and, ultimately, optimistic read, something we badly need in public education." Joel Klein, Chancellor of the New York City schools
