This book is designed to help candidates prepare for the MCQ part of the Diploma in Occupational Medicine exam. The first 150 questions, along with their answers and explanations, are designed to help readers check their understanding. This section of the book is broken down into the core subject areas on which you will be tested: * Ethics and the law * Effects of work on health * Principles of occupational health * Clinical occupational health * Health and safety at work This revised edition also contains a complete mock practice exam of 60 questions, together with answers and commentary. These questions follow the style of those in the exam and will help fully prepare candidates, by allowing them to develop an understanding of how the exam questions work. Written by a GP Registrar (and winner of the Faculty of Occupational Medicine's Mobbs Fellowship) who recently passed the exam, and checked for accuracy by a Consultant in Occupational Medicine, this book is the ideal revision and practice guide for exam candidates.

This volume constitutes the Proceedings of the 8th International Conference on Flexible Query Answering Systems, FQAS 2009, held in Roskilde, Denmark, October 26-28, 2009. FQAS 2009 was preceded by the 1994, 1996 and 1998 editions held in Roskilde, Denmark, the FQAS 2000 held in Warsaw, Poland, the 2002 held in Copenhagen, Denmark, and the 2004 and 2006 editions held in Lyon, France, and in Milan, Italy, respectively. FQAS is the premier conference concerned with the very important issue of providing users of information systems with flexible querying capabilities, and with an easy and intuitive access to information. The main objective is to achieve more expressive, informative, cooperative, and productive systems which facilitate retrieval from information repositories such as databases, libraries, heterogeneous archives and the World-Wide Web. In targeting this objective, the conference draws on several research areas, such as information retrieval, database management, information filtering, knowledge representation, soft computing, management of multimedia

information, and human-computer interaction. The conference provides a unique opportunity for researchers, developers and practitioners to explore new ideas and approaches in a multidisciplinary forum. The overall topic of the FQAS conferences is innovative query systems aimed at providing easy, flexible and human-friendly access to information. Such systems are becoming increasingly important also due to the huge and always growing number of users as well as the growing amount of available information.
