This first course CCNA 1 v7 in the 3-course CCNA v7 series introduces architectures, models, protocols, and networking elements – functions needed to support the operations and priorities of Fortune 500 companies to small innovative retailers.

Networking online test, online practice test, exam, quiz

Simply put, a network is a collection of interconnected devices (such as computers, printers, etc.). To understand the importance of networks, let us look at how things worked before networks were created. For this, consider a large multinational company that sells food products in a time when networks did not exist.

What is a network? - Introduction to networks - KS3 ...

An extranet is a network area where people or corporate partners external to the company access data. An intranet simply describes the network area that is normally accessed only by internal personnel. The wired LAN is affected by BYODs (bring your own devices) when the devices attach to the wired network.

CCNA 1 (v5.1 + v6.0) Chapter 4 Exam Answers 2020 - 100% Full

Students who complete Introduction to Networks will be able to perform the following functions: Explain network technologies. Explain how devices access local and remote network resources. Implement basic network connectivity between devices. Design an IP addressing scheme to provide network connectivity for a small to medium-sized business network.

A crossover cable is used to interconnect similar devices together like switch to a switch, a host to a host, or a router to a router. If a switch has the MDIX capability, a crossover could be used to connect the switch to the router; however, that option is not available. A rollover cable is used to connect to a router or switch console port. 7.
