Statistics was developed around three central themes - Clarity, Quality, and Accuracy. These central themes were born out of extensive market research and feedback from statistics instructors across the country. The authors paid close attention to how material is presented to students, ensuring that the content in the text is very clear, concise, and digestible. High quality exercises, examples and integration of technology are important aspects of an Introductory Statistics text. The authors have provided robust exercise sets that range in difficulty. They have also focused keen attention to

ensure that examples provide clear instruction to students. Technology is integrated throughout the text, providing students examples of how to use the TI-83 Plus and TI-84 Plus Graphing Calculators, Microsoft Excel and Minitab. The accuracy of Elementary Statistics was a foundational principle always on the minds of the authors. While this certainly pertains to all aspects of the text, the authors also exhausted energy in ensuring the supplements have been developed to fit cohesively with the text.

Hill Humanities, Social Sciences & World Languages Key to Geometry introduces students to a wide range of geometric discoveries as they do step-by-step constructions. Using only a pencil, compass, and straightedge, students begin by drawing lines, bisecting angles, and reproducing segments. Later

---

they do sophisticated constructions involving over a dozen steps. When they finish, students will have been introduced to 134 geometric terms and will be ready to tackle formal proofs. Includes: Book 2 of Key to Geometry

McGraw Hill Professional Communication Research: Asking Questions, Finding Answers covers basic research issues and processes, both quantitative and qualitative, appropriate for communication students with little or no previous research methods experience. The text's guiding principle is that methodological choices are made from one's research questions or hypotheses. This avoids the pitfall in which students learn one methodology or one methodological skill and then force that method to answer all types of questions. Instead of working with one methodology to answer all types of questions, students come away

understanding a variety of methods and how to apply them appropriately.

In this #1 national bestseller, a journalist who's been attacked by Antifa writes a deeply researched and reported account of the group's history and tactics. When Andy Ngo was attacked in the streets by Antifa in the summer of 2019, most people assumed it was an isolated incident. But those who'd been following Ngo's reporting in outlets like the New York Post and Quillette knew that the attack was only the latest in a long line of crimes perpetrated by Antifa. In *Unmasked*, Andy Ngo tells the story of this violent extremist

---

movement from the very beginning. He includes interviews with former followers of the group, people who've been attacked by them, and incorporates stories from his own life. This book contains a trove of documents obtained by the author, published for the first time ever.

FitWell empowers students to become active participants in their own health through a first-of-its-kind student-centered approach. McGraw-Hill conducted extensive market research with over 4,000 students to gain insight into their studying and buying behavior. Students told us they wanted more portability with innovative visual appeal and content that is designed according to the way they learn. Instructors we surveyed told us they wanted a way to engage their students without compromising on high quality content. Our findings concluded that students who

---

actively participated in their own learning actually retained more information and were able to apply it more often to their every day lives. How could we build a program for students that would promote active learning while providing visual appeal, portability, and relevance? We are excited to introduce to you the first-of-its-kind program for Fitness and Wellness. FitWell delivers the serious content you want in both a magazine-style format that 's fun to read and an online learning space that commands active learning. We began by collecting over 1,000 Fitness and Wellness questions asked by real students. Questions like, " How can I improve my self-esteem? " or " Do I really need 8

glasses of water a day? " introduce each section of material throughout the program. With its series of assignable videos that debunk common health and fitness myths ( " Sit Ups Make Your Stomach Flatter " or " Marijuana gives you munchies " ), FitWell grabs hold of students ' attention and doesn ' t let go. The real-life behavior change case study videos found online provide students with unmatched relevance. Students click, watch, and learn: these videos follow real college students attempting to change their behavior for an entire semester, and hopefully for life. With its online Fitness assessments, assignable interactive animations, and online labs, FitWell engages students like no other fitness and

wellness program. The Right Conversations: To make our program relevant, we wanted to understand what students care about when it comes to their health and well-being. It turned out, when it comes to Fitness and Wellness, students had a lot of questions! We compiled over 1,000 questions that students asked our authors. These real student questions like, " Can colds really come from stress? " or " What ' s the best exercise for me? " introduce each section of material, ensuring the content that follows is always research-based and relevant. Instead of passively reading, your students actively engage in questions, answers, and conversations that are of interest to them. The Right Instruction: Assign

---

your students a series of short video clips throughout the semester that track the progress of real students making behavior changes in their lives. Follow Greg on his quest to begin exercising and watch him document his challenges on camera. Will he be able to make lasting, healthy choices? Your students will have to tune in and find out for themselves! Captivate your students by assigning “ Myth/Fact ” videos that explore common myths, like “ Oily Foods Give You Acne ” , and separate the fact from fiction. Students actively work through the FitWell system online and in their magazine-style text, completing fitness assessments, interactive animations, and labs. Not only does this format produce

measurable results that are documented online, but the focus on active learning is the first step towards inspiring more active students. The Right Time: The time is right for a flexible hybrid print-digital learning system that meets students online, where they already work, play, and live.
