When the honeybee population disappears and a pandemic sweeps across the planet, the government tried a bio-engineered cure even deadlier than the problem.

Branded with the mark of the vaccine, Fiona must navigate this new dystopian

world. But there's no cure for being stung. . . Fiona doesn't remember going to sleep. But when she opens her eyes, she discovers her entire world has been altered-her house is abandoned and broken, and the entire neighborhood is barren and dead. Even stranger is the tattoo on her right wrist-a black oval with five marks on either side-that she doesn't remember getting but somehow knows she must cover at any cost. And she's right. When the

honeybee population collapsed, a worldwide pandemic occurred and the government tried to bio-engineer a cure. Only the solution was deadlier than the original problem--the vaccination turned people into ferocious, deadly beasts who were branded as a warning to un-vaccinated survivors. Key people needed to rebuild society are protected from disease and beasts inside a fortress-like wall. But Fiona has awakened

branded, alone-and on the wrong side of the wall . . .

Ringhof A unique field guide and reference, Where to Watch Birds in South America is designed to help the avid birder and the general wildlife enthusiast organize eventful journeys throughout the richest continent for birds, where the species number over three thousand. This book covers more than two hundred of the best sites for birdwatching, and includes the archipelagos of Trinidad and	Tobago, the Galapagos and Falkland Islands, the Netherland Antilles, and part of Antarctica. The reader will find details of every species that is endemic to particular countries, and will learn where and when best to see such birds as the scarlet ibis, Andean condor, harpy eagle, sunbittern, macaw, toucan, jacamar, antbird, and cotinga. The text is enhanced by nearly one hundred maps and fifty line drawings. There are even hints as	to where species not seen for decades may be rediscovered. This guide begins with an introduction to the continent and its birds then deals with particular countries and archipelagos. The site details include bird lists, a list of other wildlife present, and the latest advice on where to look for birds. For the traveler, there is information on transport, accommodations , safety, and health, and answers to

The Circle of

Knowledge is an
informative book
that was

designed in
1917, to be both
inspiring and
entertaining. The

book represents the modern, progressive spirit which fits that time, in its forms of expression and its editorship. The purpose of this work is to answer the why, who, what, when, where, how of the wide majority of curious minds, both young and adult, and encourage them to raise further questions. Special measures were taken in creating this work to isolate essentials from non-essentials; to differentiate

human interest subjects of universal significance from those of little concern; to deliver living truths instead of dead vocabulary; and finally, to bring the whole within the knowledge of the intermediate reader, without regard to age, in an acceptable and exciting form. The use of visual outlines and tables; maps, drawings, and diagrams; the illustrated works of great painters, sculptors, and architects all are

used to give the reader the valuable and cultural knowledge of past and present.

Sanger Rainsford is a big-game hunter, who finds himself washed up on an island owned by the eccentric General Zaroff. Zaroff, a big-game hunter himself, has heard of Rainsford's abilities with a gun and organises a hunt. However,

they're not after animals – they're after people. When he protests, Rainsford the hunter becomes Rainsford the hunted. Sharing similarities with "The Hunger Games", starring Jennifer Lawrence, this is the story that created the template for pitting man against man. Born in New York, Richard Connell (1893 – 1949) went on to become an acclaimed author, screenwriter, and journalist. He is best remembered for the gripping novel "The Most Dangerous Game" and for receiving an Oscar nomination for the screenplay "Meet John Doe". *Lunch with Lenin and Other Stories* Scholastic Lets Taco Bout Math is a 150 page composition notebook, containing college ruled lined cream coloured pages. When a fire leaves twelve-year-old Scarlet in a different foster home than her autistic little

brother, she tracks a bird to find her way back to him in this deeply moving illustrated novel from the author of *Wild Wings*.

Scarlet doesn't have an easy life. She's never known her dad, her mom suffers from depression, and her younger brother Red has Asperger's and relies heavily on her to make the world a safe place for him. Scarlet does this by indulging Red's passion for birds, telling him stories about the day they'll go to Trinidad and see all the wonderful birds there (especially his

beloved Scarlet Ibis), saving her money to take him to the zoo, helping him collect bird feathers, and even caring for a baby pigeon who is nesting outside his window. But things with her mom are getting harder, and after a dangerous accident, Scarlet and Red are taken into foster care and separated. As Scarlet struggles to cope with the sudden changes in her life and her complex feelings towards her mom, the one thing she won't give up on is finding Red. Nothing is going to get in her way—even if it

might destroy the new possibilities offered to her by her foster family.

Northwestern University Press <Disabling Characters provides detailed analyses of selected young adult (YA) novels and short stories. It looks at the relative agency of the disabled character, the behavior of the other characters, the environment in which the character must live, the assumptions that seem to be

underlying certain scenes, and the extent to which the book challenges or perpetuates an unsatisfactory status quo. Class discussions about disability-themed literature, however well intentioned, have the potential to reinforce harmful myths or stereotypes about disability. In contrast, discussions informed by a critical disability studies perspective can help readers develop more sophisticated

views of disability and contribute to a more just and inclusive society. The book examines discussion questions, lesson plans, study guides, and other supplemental materials aimed at students studying these texts, and it suggests more critical questions to pose about these texts and the positive and/or negative work they do, perhaps subliminally, in our culture. This book is a much-needed addition to college

classes in YA
literature, literary
analysis,
methods of
teaching
literature,
disability studies,
cultural studies,
contemporary
criticism, special
education, and
adolescent
literacy.
