Keyboard Music Before 1700

McClelland & Stewart

There have been numerous publications in the last decades on the Bible in literature, film, and art. But until now, no reference work has yet appeared on the Bible as it appears in Western music. In *The Bible in Music: A Dictionary of Songs, Works, and More*, scholars Siobhán Dowling Long and John F. A. Sawyer correct this gap in Biblical reference literature, providing for the first time a convenient guide to musical

interpretations of the Bible. Alongside examples of classical music from the Middle Ages through modern times, Dowling Long and Sawyer also bring attention to the Bible's impact on popular culture with numerous entries on hymns, spirituals, musicals, film music, and contemporary popular music. Each entry contains essential information about the original context of the work (date, composer, etc.) and, where relevant, its afterlife in literature, film, politics, and liturgy. It includes an

index of biblical references and an index of biblical names, as well as a detailed timeline that brings to the fore key events, works, and publications, placing them in their historical context. There is also a bibliography, a glossary of technical terms, and an index of artists, authors, and composers. The Bible in Music will fascinate anyone familiar with the Bible, but it is also designed to encourage choirs, musicians, musicologists, lecturers, teachers, and students of music and

religious education to discover and perform some less well-known pieces, as well as helping them to listen to familiar music with a fresh awareness of what it is about.

Luther on Music Chronicle Books

The study aims to analyse the impact of Luther's theology on his thoughts about music. It limits itself to an analysis of the topic by

focusing on the three most important statements of Luther about music in his unfinished treatise μ [On Music]. The first statement is that music is "a gift of God and not of man" [Dei donum hominum est], second, music "creates joyful soul" [facit letos animos], and third, music "drives away the devil" [fugat diabolum]. The relation between these three statements to each other and to Luther's theology in general can be understood in connection with his personal experiences and commitments to music, which were undergirded by his theology. Luther, as a man of medieval times, took for granted the existence of the devil, and many of his writings contained frequent references to the personal attacks of the devil, where it influenced his thoughts about music.

Does new media represent a 'new avant-garde' of information? How can an information society be represented iconically if the activities that define it are all so dynamic? What are the cultural consequences of extending the

internet into the physical world? In proposing software as modernity's new societal force, this book seeks to reclassify software as today's revitalized combustion engine, underpinning the logic of contemporary culture. Manovich investigates the ways in which the shift from an industrial to information society has resulted in new aesthetic sensibilities and representations. He describes software as the internal combustion engine of the information society, arguing that it is in software that the new cultural logic manifests itself most clearly. This is a cutting-edge and systematic examination of contemporary culture by the creator of the field of software studies.

The purpose of this volume is to: (1) establish the importance of music--especially in Luther's early life, in his education in the schools, and in his life in the monastery--in shaping his understanding of the role of music in the Christian life; (2) show how Luther's developing understanding of music in Christian life and worship led him to a practical and many-faceted involvement in a variety of music's aspects; (3) bring into sharp relief several distinct

paradigms, or patterns of thought, that dominated Luther's theological understanding of the role of music in the church's life and ministry.

Horace's Satires owe debts of influence to a wide range of genres and authors, including, as this study demonstrates, the moral tradition of Epicureanism. Focusing on the philosopher Philodemus of Gadara, it argues that the central concerns of his work lie at the heart of the poet's criticisms of Roman society and its shortcomings.

disabilities in the Roman world. The contributors examine the topic a capite ad calcem, from head to toe. Chapters deal with mental and intellectual disability, alcoholism, visual impairment, speech disorders, hermaphroditism, monstrous births, mobility problems, osteology and visual representations of disparate bodies. The authors fully engage with literary, papyrological, and epigraphical sources, while iconography and osteo-archaeology are taken into account. Also the late ancient evidence is taken into account. Refraining from a radical constructionist standpoint, the contributors acknowledge the possibility of discovering significant differences in the way impairment was

culturally viewed or assessed.

In the summer of 1348, as the Black Death ravages their city, ten young Florentines take refuge in the countryside. They amuse themselves by each telling a story a day for the ten days they are destined to remain there - a hundred stories of love, adventure and surprising twists of fate. Less preoccupied with abstract concepts of morality or religion than earthly values, the tales range from the bawdy Peronella hiding her lover in a tub to Ser Cepperallo, who, despite his unholy effrontery, becomes a Saint. The result is a towering monument of European literature and a masterpiece of imaginative narrative.
