The Way to Rainy Mountain recalls the journey of Tai-me, the sacred Sun Dance doll, and of Tai-me's people in three unique voices: the legendary, the historical, and the contemporary. It is also the personal journey of N. Scott Momaday, who on a pilgrimage to the grave of his Kiowa grandmother traversed the same route taken by his forebears and in so doing confronted his Kiowa heritage. It is an evocation of three things in particular: a

landscape that is incomparable, a time that is gone forever, and the human spirit, which endures. Celebrating fifty years since its 1969 release, this new edition offers a moving new preface and invites a new generation of readers to explore the Kiowa myths, legends, and history with Pulitzer Prize-winning author N. Scott Momaday. Essays in Honor of R.A. Foakes Sophia Perennis

This book focuses on Yellowstone: the park, the larger ecosystem, and even more so, the "idea" of Yellowstone. In presenting a case for a new conservation paradigm for the Greater Yellowstone Ecosystem (GYE), including Yellowstone National Park, the book, at its heart, is about people and nature relationships. This new paradigm will be truly committed to a healthy, sustainable environment, rich in other life forms, and one that affords dignity for all: humans and nonhumans. The new story or paradigm must be about living such a commitment and future for GYE in real time. To do something and understand about the present erosion of nature and growing unsustainability, particularly the GYE situation, the book offers a heuristic for problem solving, learning, and

---

discovery. The heuristic in four general terms, People, Meaning, Society, Environment, takes into account both the content (biophysical substance such as wolves and bears) and process (people, social relations, and decision-making) of conservation and sustainability in our communities, society, and in our daily living. It calls for an explicit integrative approach to this relationship for GYE. It acknowledges that Yellowstone will be different in the future from what we have experienced in recent decades. It also asks how and why it will be different and whether we 're ready for it. To examine these and related questions, and deeper questions, it probes the future. As well, it reflects on the changing narratives, policies, and actions of different sets of residents and outside influences. The book presents a well-developed theory for interdisciplinary problem solving that is grounded in practice.

With a Notice of Its Early History in the East, and in All the Quarters of the Globe, a Description of the Great Mechanical Inventions which Have Caused Its Unexampled Extension in Britain; and a View of the Present State of the Manufacture, and the Condition of the Classes Engaged in Its Several Departments McFarland

scholarship in this rapidly expanding field. The forty-four articles in this book take stock of the history, evolving literature, and current trajectories of new world history. These essays, together with the editors' introductions to thematic chapters, encourage educators and students to reflect critically on the development of the field and to explore concepts, approaches, and insights valuable to their own work. The selections are organized in ten chapters that survey the history of the movement, the seminal ideas of founding thinkers and today's practitioners, changing concepts of world historical space and time, comparative methods, environmental history, the "big history" movement, globalization, debates over the meaning of Western power, and ongoing questions about the intellectual premises and assumptions that have shaped the field.

With the conversion of Constantine in 312, Christianity began a period of political and cultural dominance that it would enjoy until the twentieth century. Jacob Neusner contradicts the prevailing view that following Christianity's ascendancy, Judaism continued to evolve in isolation. He argues that because of the political need to defend its claims to religious authenticity, Judaism was forced to review itself in the context of a triumphant Christianity. The definition of issues long discussed in Judaism—the meaning of history, the coming of the Messiah, and the political identity of Israel—became of immediate and urgent concern to both parties. What emerged was a polemical dialogue

between Christian and Jewish teachers that was unprecedented. In a close analysis of texts by the Christian theologians Eusebius, Aphrahat, and Chrysostom on one hand, and of the central Jewish works the Talmud of the Land of Israel, the Genesis Rabbah, and the Leviticus Rabbah on the other, Neusner finds that both religious groups turned to the same corpus of Hebrew scripture to examine the same fundamental issues. Eusebius and Genesis Rabbah both address the issue of history, Chrysostom and the Talmud the issue of the Messiah, and Aphrahat and Leviticus Rabbah the issue of Israel. As Neusner demonstrates, the conclusions drawn shaped the dialogue between the two religions for the rest of their shared history in the West.

Exploring Soviet and Russian history, politics, and foreign policy, *The Uses of History* brings together the classic essays of renowned scholar Alexander Dallin. The author provides insightful analysis and nuanced interpretations of such key-and controversial-issues as the domestic sources of Soviet foreign policy, Stalin's leadership in World War II, Russian-American relations in the Reagan era, the causes of the collapse of the USSR, and the disappointments of Russia's post-Soviet evolution. With his incisive assessment of the biases and blunders in American interpretations, Dallin rejects single-factor explanations for Soviet and Russian domestic and foreign policies,

instead examining the complex interplay of internal and external conditions, institutions, mindsets, and the role of individual leaders. All readers interested in Soviet and post-Soviet history will find this collection a stimulating and deeply knowledgeable resource.

One of the most time-consuming tasks in clinical medicine is seeking the opinions of specialist colleagues. There is a pressure not only to make referrals appropriate but also to summarize the case in the language of the specialist. This book explains basic physiologic and pathophysiologic mechanisms of cardiovascular disease in a straightforward manner, gives guidelines as to when referral is appropriate, and, uniquely, explains what the specialist is likely to do. It is ideal for any hospital doctor, generalist, or even senior medical student who may need a cardiology opinion, or for that matter.

From the author of No.1 international bestseller *Collapse*, a mesmerizing portrait of the human past that offers profound lessons for how we can live today. Visionary, prize-winning author Jared Diamond changed the way we think about the rise and fall of human civilizations with his previous international bestsellers *Guns, Germs and Steel* and *Collapse*. Now he returns with another epic - and groundbreaking - journey into our rapidly receding past. In *The World Until Yesterday*, Diamond reveals how traditional

societies around the world offer an extraordinary window onto how our ancestors lived for the majority of human history - until virtually yesterday, in evolutionary terms - and provide unique, often overlooked insights into human nature. Drawing extensively on his decades working in the jungles of Papua New Guinea, Diamond explores how tribal societies approach essential human problems, from childrearing to conflict resolution to health, and discovers we have much to learn from traditional ways of life. He unearths remarkable findings - from the reason why modern afflictions like diabetes, obesity and Alzheimer's are virtually non-existent in tribal societies to the surprising benefits of multilingualism. Panoramic in scope and thrillingly original, *The World Until Yesterday* provides an enthralling first-hand picture of the human past that also suggests profound lessons for how to live well today. Jared Diamond is the Pulitzer Prize-winning author of the seminal million-copy-bestseller *Guns, Germs, and Steel*, which was named one of TIME's best non-fiction books of all time, and *Collapse*, a #1 international bestseller. A professor of geography at UCLA and noted polymath, Diamond's work has been influential in the fields of anthropology, biology, ornithology, ecology and history, among others.

In the face of conflict and despair, we often console ourselves by saying that history will be the judge. Today's oppressors may escape being held responsible for their crimes, but the future will condemn them. Those who stand up for progressive values are on the right side of history. As ideas once condemned to the dustbin of history—white supremacy, hypernationalism, even fascism—return to the world, threatening democratic institutions and values, can we still hold out hope that history will render its verdict? Joan Wallach Scott critically examines the belief that history will redeem us, revealing the implicit politics of appeals to the judgment of history. She argues that the notion of a linear, ever-improving direction of history hides the persistence of power structures and hinders the pursuit of

alternative futures. This vision of necessary progress perpetuates the assumption that the nation-state is the culmination of history and the ultimate source for rectifying injustice. Scott considers the Nuremberg Tribunal and South Africa's Truth and Reconciliation Commission, which claimed to carry out history's judgment on Nazism and apartheid, and contrasts them with the movement for reparations for slavery in the United States. Advocates for reparations call into question a national history that has long ignored enslavement and its racist legacies. Only by this kind of critical questioning of the place of the nation-state as the final source of history's judgment, this book shows, can we open up room for radically different conceptions of justice.

The conventional history of animals could be more accurately described as the history of human ideas about animals. Only in the last few decades have scholars from a wide variety of disciplines attempted to document the lives of historical animals in ways that recognize their agency as sentient beings with complex intelligence. This collection advances the field further, inviting us to examine our

recorded history through an animal-centric lens to discover how animals have altered the course of our collective past. The seventeen scholars gathered here present case studies from the Pacific Ocean, Africa, Europe, and the Americas, involving species ranging from gorillas and horses to salamanders and orcas. Together they seek out new methodologies, questions, and stories that challenge accepted historical assumptions and structures. Drawing upon environmental, social, and political history, the contributors employ research from such wide-ranging fields as philosophy and veterinary medicine, embracing a radical interdisciplinarity that is crucial to understanding our nonhuman past. Grounded in the knowledge that there has never been a purely human time in world history, this collection asks and answers an incredibly urgent question for historians and others interested in the nonhuman past: in an age of mass extinctions, mass animal captivity, and climate change, when we know much of what animals have done in the past, which of our activities will we want to change in the future?

What makes a great teacher great? Who are the professors students remember long after graduation?

This book, the conclusion of a fifteen-year study of nearly one hundred college teachers in a wide variety of fields and universities, offers valuable answers for all educators. The short answer is—it's not what teachers do, it's what they understand.

Lesson plans and lecture notes matter less than the special way teachers comprehend the subject and value human learning.

Whether historians or physicists, in El Paso or St. Paul, the best teachers know their subjects inside and out—but they also know how to engage and challenge students and to provoke impassioned responses. Most of all, they believe two things fervently: that teaching matters and that students can learn.
