Help students appreciate texts and write about them with conviction. Responding to a comprehension question is a surprisingly complex task. It draws on multiple skills: students must be able to read and analyze a text passage; consider what aspect of the text the question addresses; and then quickly and concisely write about their ideas, citing evidence to support them. Hence the prominence of constructed-response questions in standardized testing. In this refreshingly clear and upbeat guide, literacy consultant Nancy Boyles gives a step-by-step demonstration of how to help students achieve success with this task—and in the process of unpacking the steps involved, demonstrates how the instruction can inspire teachers' creativity as well as deepen students' literacy skills. Filled with ready-to-use scaffolds for every stage of instruction—sets of sample questions, anchor charts, cue cards, answer frames—this is a one-stop resource for teaching students how to organize their thoughts about what they've read, and then set them down in writing.

GRE Reading Comprehension: Detailed Solutions to 325 Questions Houghton Mifflin Harcourt

Since reading is a strategic skill, students must have a strategy for comprehending the reading text and dealing with reading tasks especially answering reading comprehension questions (Roe et al., 2001). A questioning strategy utilized in developing reading comprehension skills is what Taffy Raphael refers to as Question- Answer Relationships or QAR (Nuttall, 2005). With QAR, teachers can help students become strategic while dealing with a text and questions simultaneously. The QAR strategy explicitly shows the relationship between questions and answers, and how to search for information in a text according to different types of questions. Furthermore, with the practice of Question Answer Relationships (QAR) strategy and its related reading strategies, students can become more familiar with different types of reading questions and consciously select the related reading strategies appropriately in order to answer each type of questions correctly and understand the whole text as much as possible. This book therefore tried to investigate how reading instruction using Question Answer Relationships (QAR) and its related reading strategies affected reading comprehension ability.
