Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how

children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

This monograph provides valuable lessons in building disaster resilience for rural communities and beyond. With a focus on Florida, the authors present a comprehensive review of the current debates surrounding the study of resilience, from

federal frameworks, state plans and local initiatives. They also review evaluation tools and feature first-hand accounts of county emergency managers as well as non-profit and community groups on key issues, including perspectives on vulnerable groups such as the elderly, children and farm workers. Readers will find insightful answers to such questions as: How can the concept of resilience be used as a framework to investigate the conditions that lead to stronger, more sustainable communities? What factors account for the variation across jurisdictions and geographic units in the ability to respond to and recover from a disaster? How does the recovery process impact the social, political and economic institutions of the stricken communities? How do communities, especially rural ones, collaborate with multiple stakeholders (local, regional, state, national) during the transition from recovery to resilience? Can the collaborative nature of disaster recovery help build resilient communities?. The primary audiences of this book are scholars in emergency and crisis management, planning and policy, disaster response and recovery, disaster sociology and environmental management and policy. This book can also be used as a textbook in graduate and advanced undergraduate programs / courses on disaster management, disaster studies, emergency and crisis management, environmental policy and management and public policy and administration.

Florida Driver's Pocket Book Walch Publishing Criminal Law in Focus (CLIF) provides an updated approach to the first-year criminal law casebook, with coverage and pedagogy that reflects modern criminal law practice. Alongside the traditional justificatory theories of punishment, the book

considers punishment as a tool for social control, the rise of mass incarceration, and racial disparities in criminal enforcement. Using compelling cases that clearly articulate legal doctrine, this book covers core traditional offenses (like homicide and rape), as well as those that figure prominently in modern practice, but which have historically been absent from or deemphasized in the criminal law curriculum (like drug possession and property crimes). The Real Life Applications feature following each case poses a series of questions to spotlight important topics that might otherwise be overlooked, such as prosecutorial discretion and plea bargaining. Straightforward exposition helps students navigate their way around the differences and tensions between jurisdictional approaches to defining crimes and defenses. Features: CLIF goes beyond the traditional coverage of most casebooks, (which focus primarily on homicide offenses, rape, and (to a lesser extent) theft crimes). With expanded coverage of property offenses, an entire chapter on drug offenses, and coverage of contemporary issues (such as child pornography offenses and the public authority defense), CLIF reflects a wider, more inclusive perspective on criminal law today. Most criminal law casebooks place extended coverage of the elements of crime (mens rea, actus reus, and causation) at the front of the book, before covering individual criminal offenses—which requires students to grapple with these concepts in the abstract. By contrast, CLIF provides a brief, early introduction to the elements of crime (which can be covered in one class); it then pivots to an integrated discussion of specific criminal offenses and covers principles related to mens rea, actus reus, and causation in the context of those offenses. Chapter 10 also covers the interpretation of criminal statutes. At 550 pages, CLIF is much shorter than most criminal law casebooks, even though it includes topics (e.g., drug crimes) that aren't covered in most criminal law casebooks. Professors and students will benefit from: Coverage of offenses that are either absent from, or deemphasized in, most other casebooks, CLIF helps professors to design a course that improves both bar-exam readiness and practice readiness. The inclusion of issues related to mass incarceration in the first chapter

modernizes the traditional "purposes of punishment" material. CLIF retains coverage of justificatory theories of punishment, including the famous case of Dudley and Stephens; these theories aim to provide a morally defensible account of punishment and they are important. But they do not fully explain the reality of punishment in the United States today. By covering issues related to the rise of mass incarceration alongside the traditional theories of punishment, CLIF allows for a fuller discussion of the theory and reality of punishment. The book's innovative approach to covering the elements of crimes has a number of benefits. It is much more efficient, from a teaching perspective; it will afford professors time to cover other topics that they can't usually fit into the course (e.g., drug crimes and a more in-depth treatment of property offenses). Professors might spend 4 or 5 (or more) class sessions on the elements of crime before they can begin to cover individual offenses. This is not necessary: Most of these concepts are more effectively covered in the context of specific crimes (e.g., intent and mistakes of fact can both be introduced in the context of larceny; willful blindness can be addressed in the context of drug crimes). Then, after students have learned about these concepts in the context of individual offenses, the concepts can be tied together in 1 or 2 class sessions using the materials in Chapter 10. Covering difficult mens rea and actus reus concepts in depth before covering individual crimes (as most books do) often leaves students confused. They don't have enough context to appreciate how the difficult mens rea problems fit into criminal law doctrine, for example. The structure in CLIF teaches students the basics first. Once they have that foundation, they are better able to grapple with the more complex mens rea questions in Chapter 10. The traditional approach can be frustrating for faculty, as well. It is a bit like trying to teach someone about the broad structure of mathematics before they have learned basic arithmetic. The approach in CLIF more accurately reflects criminal law practice. In a real-world case, the prosecutor and defense do not argue about mens rea or actus reus in the abstract. Instead, the parties are focused on the elements of the specific crime(s) at issue. When

difficult mens rea or actus reus questions arise in answer keys. practice, it is in the context of the elements of a particular crime.

The adolescent period has attracted much attention as an ideal period for investigating interactive models incorporating biological maturation with intra- and interpersonal development. The focus of this volume is on adolescent transitions in three domains: the peer system, the family system, and school and work contexts. Its goal is to highlight specific aspects of innovative research programs and initiatives, and look forward to future directions in the field. Because interest in adolescence has spanned the disciplines, this volume reflects a multidisciplinary perspective--presenting research and methods from life-span development, sociology, anthropology, and education to provide exemplars of the range of approaches used in understanding the processes and transitions of adolescent development. These exemplars encompass the breadth not only of the investigation of adolescence--from survey research on drug use to ethnographic studies of involvement in criminal activities--but also of individual differences in the experience of adolescent transitions--from the transition to college and work in White, middle-class youth to the work experiences of urban, African-American high school students. The chapters collected here offer a rich sample of the diversity of research experience with an emphasis on in-depth investigation of adolescent transitions. The volume will serve as a resource to investigators across several disciplines as it identifies approaches and recent findings from alternate fields.

We all know the story of Thanksgiving. Or do we? This uniquely American holiday has a rich and little known history beyond the famous feast of 1621. In Thanksgiving, award-winning author Melanie Kirkpatrick journeys through four centuries of history, giving us a vivid portrait of our nation's best-loved holiday. Drawing on newspaper accounts, private correspondence, historical documents, and cookbooks, Thanksgiving brings to life the full history of the holiday and what it has meant to generations of Americans. Many famous figures walk these pages–Washington, who proclaimed our first Thanksgiving as a nation amid controversy about his Constitutional power to do so; Lincoln, who wanted to heal a divided nation sick of war when he called for all Americans–North and South–to mark a Thanksgiving Day; FDR, who set off a debate on state's rights when he changed the traditional date of Thanksgiving. Ordinary Americans also play key roles in the Thanksgiving story–the New England Indians who boycott Thanksgiving as a Day of Mourning; Sarah Josepha Hale, the nineteenth-century editor and feminist who successfully campaigned for Thanksgiving to be a national holiday; the 92nd Street Y in New York City, which founded Giving Tuesday, an online charity established in the long tradition of Thanksgiving generosity. Kirkpatrick also examines the history of Thanksgiving football and, of course, Thanksgiving dinner. While the rites and rituals of the holiday have evolved over the centuries, its essence

remains the same: family and friends feasting together in a spirit of gratitude to God, neighborliness, and hospitality. Thanksgiving is Americans' oldest tradition. Kirkpatrick's enlightening exploration offers a fascinating look at the meaning of the holiday that we gather together to celebrate on the fourth Thursday of November. With Readings for Thanksgiving Day designed to be read aloud around the table.
