Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If

you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been

identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by

first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.

Fire Engineering's Handbook for Hazardous Materials Response
Mometrix Secrets Study Guides

A fire fighter's ability to recognize an incident involving hazardous materials is critical. They must possess the knowledge required to identify the presence of hazardous materials and weapons of mass destruction (WMD), and have an understanding of what their role is within the response plan. Hazardous

Materials Awareness and Operations will provide fire fighters and first responders with these skills and enable them to keep themselves and others safe while mitigating these potentially deadly incidents. Hazardous Materials Awareness and Operations is the center of an integrated teaching and learning system that combines groundbreaking content with dynamic new features to support instructors and to help prepare students for the job. The text meets and exceeds the requirements for Fire Fighter I and II certification and satisfies the core competencies for operations level responders including the

eight mission-specific responsibilities for first responders within the 2008 Edition of NFPA 472, Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents. Additionally, the material presented also exceeds the hazardous materials response requirements of the Occupational Safety and Health Administration (OSHA) and the Environmental Protection Agency (EPA). Hazardous Materials Awareness and Operations provides in-depth coverage of: the properties and effects of hazardous materials and

WMDs; how to calculate potential danger and initiate a response plan; selection, use, advantages, and disadvantages of personal protective equipment; performing mass and technical decontamination; performing evidence preservation and sampling; performing product control. Performing air monitoring and sampling; performing victim rescue and recovery; and responding to illicit laboratory incidents. Handbook of Hazardous

Materials is a one-volume compendium of hazardous materials that discusses the toxic effects of these materials on human health and the global environment. It provides comprehensive coverage of individual toxic elements, covers hazardous material groups, and includes more general articles such as evaluation and testing of carcinogens, transport of pollutants, and inhalation toxicology. The fully referenced articles are presented in alphabetical order. The book features a subject index as well as numerous cross-references. Individual articles are preceded by a topical outline and discuss

the origin, prevalence, mechanisms of toxicity and damaging effects of each hazardous material. Comprehensive coverage of individual toxic elements, including Asbestos Alar Lead Mercury Coverage of hazardous material groups, such as Pesticides Food additives Nitrogen compounds More general articles, such as Evaluation and testing of carcinogens Transport of pollutants Inhalation toxicology Hazardous Materials Jones & Bartlett Publishers Marked by its risk-based response philosophy, Hazardous Materials Incidents is an invaluable procedural

manual and all-inclusive information resource for emergency services professionals faced with the challenge of responding swiftly and effectively to hazardous materials and terrorism incidents. Easy-to-read and perfect for use in HazMat awareness, operations, and technician-level training courses, this "Operations Plus" book begins by acquainting readers with current laws and regulations, including those governing emergency planning and workplace safety. Subsequent chapters provide in-depth information about personal protective equipment and its limitations; protective

actions ranging from site management and rescue through evacuation and decontamination; product control including the use of carbon monoxide detectors; responses to terrorism and terrorist groups; law enforcement activities such as SWAT operations and evidence collection; and more! A key resource for every fire, police, EMS, and industrial responder, Hazardous Materials Incidents is one of the few books available today that is modeled on current ways of thinking about HazMat and terrorism responses and operations. This training manual is part of an innovative training program, developed in conjunction with the North American Transportation

Management Institute (NATMI). It utilizes a seminar format that concentrates on all levels of hazardous materials training. Transportation of hazardous materials by the trucking industry is covered in depth, as well as issues of compliance of carrier companies and individual truck drivers with Department of Transportation (DOT) regulations. Coverage meets the needs of carriers to provide HazMat refresher training that is required at least once every three years. Issues of safety and security of trucking fleets, including HazMat handling, are also addressed to help ensure that the carrier's safety

management team fulfills the task of making sure that truck drivers are trained on the transport of hazardous materials.
