The grouping consisting of Brazil, Russia, India and China (BRIC) was initially meant to be nothing more than clever investment jargon referring to the largest and most attractive emerging economies. However, these countries identified with the BRIC concept, and started to meet annually as a group in 2008. At their fourth summit in 2011, they added South Africa to become the BRICS. By then the BRICS had fully morphed from investment jargon to a name for a new economic and political grouping that had the potential to challenge the unipolar hegemony of the United States and its Western allies. This work

analyses the extent to which the concept of coexistence explains the individual foreign policies of the BRICS countries. The editors define coexistence as a strategy that promotes the establishment of a rule-based system for co-managing the global order. It recognizes that different states may legitimately pursue their own political and economic interests, but they have to do so within the bounds of a rule-based international system that ensures the peaceful coexistence of states. The BRICS and Coexistence addresses the political dimension of the emergence and influence of the BRICS in the international system and will be of interest to students and scholars of Politics, Development and International Relations.

With the successful introduction in 2010 of the Czech Yearbook of International Law, Professor Alexander J. B. Iohl á vek and Professor Nad ž da Rozehnalov á , the editors, present the 2011 volume of this ambitious project. The second volume focuses on the admittedly controversial topics relating to a shift from the investors' viewpoints on investment protection to the contrasting viewpoints of the host states, which are facing growing numbers of alleged claims by investors. Volume II has set as its objective to plot the shift in the paradigm towards a new balance between investors and host states in the investment protection system. Such a shift can be observed in the rising number of counterclaims brought by host states against investors, by the introduction of new standards for evaluation of investments in light of the good faith of the investor at the time of an investment, and by the choice of an absolute means of protection of a host state's interest against investor

claims by termination of an existing investment treaty.

These topics represent pieces of the whole mosaic of this problem, to which the second volume of the Czech Yearbook of International Law is dedicated to a wide professional audience. The Czech Yearbook of International Law (CYIL) is a collective effort by the following persons and institutions

This book examines the role of private firms in the American water and wastewater industry. As more water infrastructure shifts from public- to private-sector control, vendors, consultants, and facilities are taking on more importance.

Lewis D. Solomon presents an historical overview of water supply and treatment needs and the role of the government, including how water policy has been crafted. He argues that water scarcity is becoming a problem due to groundwater depletion, contamination, and patterns of consumption. He examines the impact of climate change on water availability and quality considering voluntary conservation programs and mandatory restrictions for water use. Solomon points to how for-profit firms can use technology to increase water supply. He describes what privatization would look like in practice and reviews evidence from two case studies. Solomon proposes privatization as a viable response to America's water crisis that can address both scarcity and capital problems. America's Water and Wastewater Crisis presents a careful examination of how the water industry has operated in the United States in the past and how it may work as we move into the future. This book is invaluable to environmental specialists, businessmen, and government officials.

The economic crisis that began in 2008 has had a significant impact on the well-being of certain segments of the population and its disruptive effects can be expected to last well into the future. The National Institute on Aging (NIA), which is concerned with this issue as it affects the older population in the United States, asked the National Research Council to review existing and ongoing research and to delineate the nature and dimensions of potential scientific inquiry in this area. The Committee on Population thus established the Steering Committee on the Challenges of Assessing the Impact of Severe Economic Recession the Elderly to convene a meeting of experts to discuss these issues.
