Designed as a textbook for teaching introductory Greek grammar and syntax, *Greek Is Good Grief* uses a graded database, beginning with the simpler Greek of John 1, moving to Mark 8 as an example of middle level Greek, and concluding with 1 Thessalonians 1:1-2 as representative of Paul's style. Working from that database, the chapters introduce first those forms which occur most frequently. Translation of the Greek New Testament itself can begin as early as Chapter 5 because translation helps are provided for those words and forms not yet encountered. The practice sentences in each chapter are, to the greatest degree possible, based on sentences taken directly from the Greek New Testament. Form identification exercises afford students the opportunity to drill on forms specific to the content of each chapter. Each new grammatical concept is introduced by a discussion of English grammar, and each chapter

begins with a *Ò Grammar Grabber* which highlights an aspect of the chapter's content by explaining how that aspect of grammar is important for understanding a portion of the Greek text of the New Testament. Field tested in both face-to-face and distance learning course formats, *Greek Is Good Grief* lays the foundation for a smooth transition to the study of Greek exegesis and exposition.

 Laying the Foundation: Digital
 Humanities in Academic
 Libraries examines the library's
 role in the development,
 implementation, and
 instruction of successful digital
 humanities projects. It pays
 special attention to the critical
 role of librarians in building
 sustainable programs. It also
 examines how libraries can
 support the use of digital
 scholarship tools and
 techniques in undergraduate
 education. Academic libraries
 are nexuses of research and
 technology; as such, they
 provide fertile ground for
 cultivating and curating digital

scholarship. However, adding digital humanities to library service models requires a clear understanding of the resources and skills required. Integrating digital scholarship into existing models calls for a reimagining of the roles of libraries and librarians. In many cases, these reimagined roles call for expanded responsibilities, often in the areas of collaborative instruction and digital asset management, and in turn these expanded responsibilities can strain already stretched resources. Laying the Foundation provides practical solutions to the challenges of successfully incorporating digital humanities programs into existing library services. Collectively, its authors argue that librarians are critical resources for teaching digital humanities to undergraduate students and that libraries are essential for publishing, preserving, and making accessible digital scholarship.
