teaching materials treat them that way? Feldman's Essentials of Understanding Psychology does. Using a revolutionary revision process, Bob Feldman's Essentials of Understanding Psychology is a fully integrated learning system that gives students an even greater opportunity to achieve success, and brings the Students First goal to a new level. With an adaptive learning system that provides an individualized learning environment and helps students identify what they

know, and more importantly, what they don't, every student has a unique experience refined to their needs. The Eleventh Edition is in the second iteration of using “ HeatMap ” technology to advise revision. Systematic and precise feedback from thousands of students was anonymously measured using LearnSmart, the adaptive learning diagnostic. Because virtually every paragraph in the previous edition is tied to several questions students answer in LearnSmart, Bob

was able to see where students struggled most...the “ hot spots ” ...and in turn refine and update these areas to be more clear, more concise, and more impactful. The 11th edition continues Bob Feldman's accessible pedagogy and hallmark research, as well as his modules-within-chapters format that is both manageable for students and allows every professor the flexibility to assign and cover what they want. education. In this regard, the authors highlight how educational technology is both a bridge and barrier to student access and inclusivity. Further, they address the ongoing discussion as to whether students need to be present for lectures, and on how having agency in their own learning can improve both retention and conceptual understanding. To link the content to current events, the authors also shed light on the impact that the COVID-19 pandemic is having on the continuity of

educational programs and on the growing importance of educational technologies. Consequently, the book offers life science educators valuable guidance on the technologies already available, and an outlook on what is yet to come.
