The Picture of Dorian Gray was first published as a serial in Lippencott's Monthly Magazine, and the publishers thought it would so offend readers that they removed nearly 500 words without Wilde's approval. Wilde soon expanded it and republished it as a novel, including a short preface justifying his art. Even though his contemporaries considered it so offensive that some argued for his prosecution, Dorian Gray today survives as a classic philosophical novel that explores themes of aestheticism and double lives. Couched in Wilde's trademark cutting wit, Dorian Gray is still being adapted today, with Dorian and his moldering portrait remaining cultural touchstones. For the United States, full involvement in World War II began and ended in the Pacific Ocean. Although the accepted grand strategy of the war was the defeat of Germany first, the sweep of Japanese victory in the weeks and months after Pearl Harbor impelled the United States to move as rapidly as it could to stem the enemy tide of conquest in the Pacific. Shocked as they were by the initial attack, the American people were also united in their determination to defeat Japan, and the Pacific war became peculiarly their own affair. In this great theater it was the United States that ran the war, and had the determining voice in answering questions of strategy and command as they arose. The natural environment made the prosecution of war in the Pacific of necessity an interservice effort, and any real account of it must, as this work does, take into full account the views and actions of the Navy as well as those of the Army and its Air Forces. These are the factors—a predominantly American theater of war covering nearly one-third the globe, and a joint conduct of war by land, sea, and air on the largest scale in American history—that make this volume on the Pacific war of particular significance today. It is the capstone of the eleven volumes published or being published in the Army's World War II series that deal with military operations in the Pacific area, and it is one that should command wide attention from the thoughtful public as well as the military reader in these days of global tension.

James Beard Foundation Book Award Winner From the author of the acclaimed 97 Orchard and her husband, a culinary historian, an in-depth exploration of the greatest food crisis the nation has ever faced—the Great Depression—and how it transformed America's culinary culture. The decade-long Great Depression, a period of shifts in the country's political and social landscape, forever changed the way America eats. Before 1929, America's relationship with food was defined by abundance. But the collapse of the economy, in both urban and rural America, left a quarter of all Americans out of work and undernourished—shattering long-held assumptions about the limitlessness of the national larder. In 1933, as women struggled to feed their families, President Roosevelt reversed long-standing biases toward government-sponsored "food charity." For the first time in American history, the federal government assumed, for a while, responsibility for feeding its citizens. The effects were widespread. Championed by Eleanor Roosevelt, "home economists" who had long fought to bring science into the kitchen rose to national stature. Tapping into America's long-standing ambivalence toward culinary enjoyment, they imposed their vision of a sturdy, utilitarian cuisine on the American dinner table. Through the Bureau of Home Economics, these women led a sweeping campaign to instill dietary recommendations, the forerunners of today's Dietary Guidelines for Americans. At the same time, rising food conglomerates introduced packaged and processed foods that gave rise to a new American cuisine based on speed and convenience. This movement toward a homogenized national cuisine sparked a revival of American regional cooking. In the ensuing decades, the tension between local traditions and culinary science has defined our national cuisine—a battle that continues today. A Square Meal examines the impact of economic contraction and environmental disaster on how Americans ate then—and the lessons and insights those experiences may hold for us today. A Square Meal features 25 black-and-white photographs.

Decades of research have demonstrated that the parent-child dyad and the environment of the family "which includes all primary caregivers" are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

This volume is centered on the performance of Lt. Gen. Joseph W. Stilwell. Stilwell was chief of staff to Chiang Kai-shek, in Chiang's capacity of commander in chief of China considered as an Allied theater; he administered U.S. lend-lease aid to China; and he commanded the CBI Theater. Chiang put him in charge of his force (three Chinese armies) in Burma during the ill-fated campaign of 1942, and this campaign, insofar as it involved his authority, is therefore described. Reading the history of the China-Burma-India Theater will be an eye opener and a lesson to those who, in the future, have to deal with

allies in far distant lands about whom so much should be known and so little is. Contemporary history is limited in its vision, as indeed is all history, insofar as the records are limited. This history is no exception; the records used are mainly of U.S. Army origin. However, time flies and experience of the past is essential to wisdom in the future. To wait for additional evidence might deny pertinent information to those who need it now. Moreover, the records turned up by the authors of this book are exceptionally rich. A careful reading of this volume will emphasize the necessity on the part of the leading participants in a combined venture to understand the characteristics and over-all objectives of the nations as well as the individuals concerned in the endeavor. If such an understanding is present, and if due weight is given it by those involved in negotiations as well as in the execution of the plans, the better will be the result. The degree to which this understanding was achieved by the leading participants is left for the reader to decide. Decisions, to be sound, must be based on up-to-date facts. The danger of making them from information supplied from not too well informed sources, and without information that could readily have been brought to bear, is self-evident.
