The title of this book, *The Accent Method of Voice Therapy*, was intriguing in its promise of a new look at voice intervention. The book is supplemented by audiotaped examples of Dr. Kotby's accent method of voice therapy. In his book, Dr. Kotby moves easily and well through the traditional classification and management of voice disorders. His discussion of management, which is well referenced by internationally known voice professionals, includes diagnosis, treatment, phonosurgery techniques, pharmacotherapy, behavior readjustment strategies, and vocal hygiene advice. Dr. Kotby introduces the accent method as a holistic process for voice therapy that involves integration of abdominodiaphragmatic breathing, body movements, and voice rhythms, as reportedly used with West African drum rhythms. The audiotapes demonstrate the use of monosyllables and multisyllables in concert with breath support and rhythmic variation of

pitch and intensity. The accent method is recommended by Dr. Kotby for managing most organic and functional voice disorders, vocal problems of professional voice users, and several speech and language disorders: dysarthria, stuttering, delayed language development, and prosody problems in hearing-impaired children.

academic institutions. The report distinguishes the memory for knowledge and skill related to procedural tasks, cognitive tasks, and perceptual-motor tasks. Memory for task knowledge has been demonstrated to be quite good. Memory for cognitive skills has been demonstrated to be quite good. Memory for psychomotor skills varies, depending on whether the task is continuous, such as riding a bicycle, or discrete, such as executing the separate performance steps involved in disassembling a rifle. Throughout the report, figures depict the relative sustainment or decay of a skill as reported in the research literature. A final section concerns the factors that influence the reacquisition of a skill after extended periods of nonuse, as might occur during a mobilization."--DTIC.

This "excellent biography" of one of the US Army's unsung heroes "provides a much-needed re-examination of the early post-Vietnam Army" (Bowling Green Daily News). By the 1970s, the United States Army was demoralized by the outcome of the Vietnam War and shifting attitudes at home. The institution as a whole needed to be reorganized and reinvigorated--and General William E. DePuy was the man for the job. In 1973, DePuy was appointed commander of the newly established Training and Doctrine Command (TRADOC). By integrating

training, doctrine, combat developments, and management in the US Army, he cultivated a military force prepared to fight and win in modern war. General William E. DePuy is the first full-length biography of this key figure in American military history. With extensive interviews with those who knew DePuy, as well as access to his personal papers, Henry G. Gole chronicles and analyzes his unique contributions to the Army and nation. Gole guides the reader from DePuy's boyhood and college days in South Dakota through the major events and achievements of his life. During World War II, DePuy served in the 357th Infantry Regiment in Europe from the Normandy invasion until 1945, when he was stationed in Czechoslovakia. DePuy was asked by George Patton to serve as his aide; he supervised clandestine operations in China; he was instrumental in establishing Special Forces in Vietnam; and he briefed President Lyndon B. Johnson in the White House. But his finest contribution was fixing a broken Army. *Domestic Support Operations* The edited, annotated diary of President Jimmy Carter--filled with insights into his presidency, his relationships with friends

---

and foes, and his lasting impact on issues that still preoccupy America and the world. Each day during his presidency, Jimmy Carter made several entries in a private diary, recording his thoughts, impressions, delights, and frustrations. He offered unvarnished assessments of cabinet members, congressmen, and foreign leaders; he narrated the progress of secret negotiations such as those that led to the Camp David Accords. When his four-year term came to an end in early 1981, the diary amounted to more than five thousand pages. But this extraordinary document has never been made public--until now. By carefully selecting the most illuminating and relevant entries, Carter has provided us with an astonishingly intimate view of his presidency. Day by day, we see his forceful advocacy for nuclear containment, sustainable energy, human rights, and peace in the Middle East. We witness his interactions with such complex personalities as Ted Kennedy, Henry Kissinger, Joe Biden, Anwar Sadat, and Menachem Begin. We get the inside story of his so-called "malaise speech," his bruising battle for the 1980 Democratic nomination, and the Iranian

hostage crisis. Remarkably, we also get Carter's retrospective comments on these topics and more: thirty years after the fact, he has annotated the diary with his candid reflections on the people and events that shaped his presidency, and on the many lessons learned. Carter is now widely seen as one of the truly wise men of our time. Offering an unprecedented look at both the man and his tenure, *White House Diary* is a fascinating book that stands as a unique contribution to the history of the American presidency.

*Requirements for Welding and Brazing Procedure and Performance Qualification*

William E. DePuy was likely the most important figure in the recovery of the United States Army from its collapse after the defeat in Vietnam. That is a rather large claim, and it suggests a precedence over a number of other distinguished officers, both his contemporaries and successors. But it is a claim that can be justified by the test of the "null hypothesis:" Could the Army that conducted the Gulf War be imagined without the actions of General DePuy and those he instructed and inspired? Clearly, it could not. There are a few officers of the period about whom one can make the same claim. To judge properly the accomplishments of General DePuy and his talented subordinates at the US Army Training and Doctrine Command (TRADOC), one must understand the sense of crises and

defeat that pervaded the Army in the 1970s. By 1973, the United States had lost the war in Vietnam. Only the most optimistic or naïve observer held out hope that the Geneva Accords would provide security for the Republic of South Vietnam. The US Army was in a shambles, with discipline destroyed and the chain of command almost nonexistent. The "All Volunteer Army" was borne on a wave of permissiveness that compounded the problems of restoring discipline. Moreover, the army was ten years behind its most likely enemy in equipment development, and it had no warfighting doctrine worthy of the same. With the able assistance of the commander of the Armor Center, General Donn Starry, General DePuy wrenched the Army from self-pity and recrimination about its defeat in Vietnam into a bruising doctrinal debate that focused the Army's intellectual energies on mechanized warfare against a first-class opponent. Critics might argue correctly that that the result was incomplete, but they out not to underestimate how far the Army had to come just to begin the discussion. General DePuy also changed the way Army battalions prepared for war. He made the US Army a doctrinal force for the first time in history. Aably seconded by General Paul Gorman, DePuy led the Army into the age of the Army Training and Evaluation Program (ARTEP). The intellectual and training initiatives were joined then, with a third concern of General DePuy's TRADOC: the development of a set of equipment requirements, with a concentration of effort on a limited number, ultimately called the "Big Five." The result was the suite of weapons that overmatched the Iraqis in Operation Desert Storm - Apache attack helicopters, M1 tanks, Bradley fighting vehicles, Patriot air defense missiles, and Black Hawk assault helicopters. General DePuy championed the recruitment of a high-quality soldiery, an effort beyond his own significant responsibilities but, even so, one he never ceased to support and forward.

The definitive biography of George VI, the hero of The King's Speech George VI reigned through taxing times. Acceding to the throne upon his brother's abdication, he was immediately confronted with the turmoil in European politics leading up to the Second World War, then the War itself, followed by a period of austerity, social transformation and loss of Empire. George was unprepared for kingship, suffering from a stammer which could make public occasions very painful for him. Moreover he had grown up in the shadow of his brother, a man who had been idolized as no royal prince has been, before or since. However, as Sarah Bradford shows in this sympathetic biography, although George was not born to be king, he died a great one. 'A triumph ... Today, alongside its all-important operations in direct support of the Global War on Terrorism, naval aviation also continues its now 60-year commitment to shaping the maritime and littoral environment through persistent forward presence. In the longer term, naval aviation is also adapting to a series of geopolitical revolutions which will dramatically increase the future demand for a secure sea base capable of projecting dominant power ashore in wartime against the full spectrum of possible opponents. It is adapting to these demands by exploiting technologies and operational practices developed in the last decade that will greatly increase its ability to surge and concentrate forces rapidly; protect the sea base from new air, surface, and undersea threats; and find, identify, locate, track, and strike mobile

as well as fixed targets ashore, under all weather conditions, and in timely enough fashion to produce the desired effects. This report discusses the following topics: (1) Formal Alliances Provide Predictable Access, Informal Coalitions Do Not; (2) Distributed Ground Forces Require Persistent, Distributed Air Support; (3) The Sea Shield Must Be Dominant If the Sea Base Is to Be Effective; (4) Adapting; (5) The Spectrum from Presence to Major Combat; (6) Technology and the Spectrum of Threat; (7) The Value of Robust Airborne Early Warning (AEW) Aircraft; (8) No Substitute for Range in Carrier Aviation; (9) The Need for Airborne Electronic Attack (AEA) is Not Going Away; (10) Land-Based Maritime Patrol Aircraft; (11) Multimission Helicopters; (12) New Capabilities and Challenges; (13) Eliminating the Weather Sanctuary for Mobile Targets; (14) Providing a Dominant Defense of the Sea Base; (15) Shoot Archers Not Arrows; (16) Make Opposing Submarines Pay for Their Inevitable Indiscretions; (17) Get Back in the Counter-Surveillance Business; and (18) The Force of the Future.
