A strikingly effective, one-of-a-kind learning resource This one-of-a-kind learning resource for neonatal nurse practitioner/clinical nurse specialist students in both academic and clinical settings uses complex case studies to reinforce the best practices in treating vulnerable neonatal patients. Based on applications and outcomes, the case study approach develops critical thinking and clinical decision making and fosters effective role transition in practice-based disciplines. Authored by leading neonatal nurse practitioner (NNP) educators nationwide, these multifaceted, unfolding case studies address and synthesize the most important content covered throughout the NNP curriculum. Additional audiences for this book include interprofessional staff working in Level II

and Level III nursery settings. Beginning with case studies for identifying maternal risk factors, and culminating in case studies for communicating with parents, this text shows a holistic view of caring for neonatal patients. Chapters organized by body system address diseases and disorders and prompt the reader for diagnosis and treatment. Progressing from basic to complex, case studies include objectives, clinical pearls, and critical thinking questions. A robust instructor tool kit contains pedagogical strategies for facilitating online discussion, chapter conclusion quizzes, a variety of simulation experiences, and more. Key Features: Uses a complex case-based learning approach for neonatal advanced practice nursing-the first book to do so Authored by leading NNP educators nationwide Provides case studies synthesizing key content areas Helps prepare students for effective role transition Includes a robust instructor toolkit and can be used in online courses Hurricane Katrina : managing law enforcement and communications in a catastrophe : hearing HC Pro, Inc. The book explores the relationship between Christology and theological anthropology through the lens provided by the theology of Karl Barth and the mind/body discussion in contemporary philosophy of mind. It thus comprises two major sections. The first develops an understanding of Karl Barth's theological anthropology focusing on three major facets: (1) the centrality of Jesus Christ for any real understanding of human persons; (2) the resources that such a christologically determined view of human nature has for engaging in interdisciplinary discourse; and (3) the ontological implications of this approach for understanding the mind/body relationship. The second part draws on this theological foundation to consider the implications that Christological anthropology has for analyzing and assessing several prominent ways of explaining the mind/body relationship. Specifically, it interacts with two broad categories of theories: 'nonreductive' forms of physicalism and 'holistic' forms of dualism. After providing a basic summary of each, the book applies the insights gained from Barth's anthropology to ascertain the extent to which the two approaches may be considered christologically adequate.

Reading Comprehension: Assisting Children with Learning Difficulties examines the complex nature of reading comprehension. It introduces a model for classifying reading comprehension based on an expanded Simple View of Reading. Issues related to assessment, diagnosis, and remediation of reading comprehension difficulties are discussed and translated into clear recommendations to inform reading intervention design and practice. It gives an informed understanding as to why reading comprehension is difficult for some children with learning disabilities such as ADHD, autism, language difficulties and dyslexia. From leading literacy research, the book develops a deeper understanding of thinking processes that facilitate comprehension at the word, discourse, and metacognitive levels. Children will benefit from the introduction of evidence-based methods for teaching reading comprehension using structured multiple-strategy frameworks.

Report of the National Reading Panel : Teaching Children to Read : an Evidence-based Assessment of the Scientific Research Literature on Reading and Its Implications for Reading Instruction Elsevier Health Sciences

Purpose: The purpose of the study was to examine the relationship between participation in a simulated neonatal resuscitation on neonatal intensive care unit (NICU) nurses' knowledge of the Neonatal Resuscitation Program (NRP) guidelines and accuracy of the psychomotor skills required during resuscitation. Design: An educational project design was used. Method: NICU nurses employed at a regional hospital in Central Illinois were asked to complete a short, online survey, participate in a simulated resuscitation, and then complete the same online survey as before. Answers from before and after the simulation were compared and evaluated for knowledge of NRP. Resuscitation skill performance was assessed during the hands-on session. (N = 10). Findings: Prior to participation in the simulated neonatal resuscitation, 90% of NICU

nurses did not have complete knowledge of NRP guidelines (N=9). During the simulated resuscitation, one out of ten NICU nurses required correction on providing ventilation per NRP guidelines. After the hands-on portion of this project, only one of the then NICU nurses did not answer all NRP based questions correctly (N=1). Conclusions: Participation in simulated neonatal resuscitation improves NICU nurses' knowledge of NRP and provides a safe place to practice and improve on resuscitation skills. Participation in simulated resuscitations should be implemented more frequently on nursing units to improve life-saving skills. Keywords: neonatal intensive care unit, Neonatal Resuscitation Program, simulated neonatal resuscitation -- Abstract.

Somewhere between "Jesus Loves  
Me" and high school cynicism, the  
childlike acceptance of pat answers  
about faith is lost--often forever.  
But while many parents find this  
transitional period daunting, they  
don't want their kids to leave the  
Christian faith just because they  
didn't get good answers to how  
prayer works or whether dinosaurs

Honest Answers is a discussion book to help parents tackle the God questions that make them sweat. This isn't the place to come for pat answers that will make their kids nod, smile, and disconnect. Janelle Alberts and Ingrid Faro know that when tweens start asking questions, they're already old enough to understand the answers. They're determined to equip parents with the language, theology, permission, and confidence to join in the discussion--and to learn how to offer deeply doctrinal answers in 140 characters or less.

The tween years present an incredible opportunity to build trust with kids and to keep them coming back to their parents for answers rather than finding other sources. With the tools and conversational tips here, mom and dad can engage in a hopeful conversation and help their children build a Christian faith to hold them steady their whole lives.

Commerce Business Daily Routledge Concept Oriented Reading Instruction (CORI) is a unique, classroom-tested model of reading instruction that breaks new ground by explicitly showing how content knowledge, reading strategies, and motivational support all merge in successful reading instruction. A theoretical perspective (engagement in reading) frames the book and provides a backdrop for its linkage between hands-on science activities and reading comprehension. Currently funded by the Interagency Educational Research

Initiative (IERI), this model has been extensively class tested and is receiving national attention that includes being featured on a PBS special on the teaching of reading. Key features of this outstanding new volume include: \*Theoretical Focus--CORI's teaching framework revolves around the engagement perspective of reading: how engaged reading develops and the classroom contexts and motivational supports that promote it. \*Content-Area Focus--Although science is the content area around which CORI has been developed, its basic framework is applicable to other content areas. \*Focus on Strategy Instruction--CORI revolves around a specific set of reading strategies that the National Reading Panel (2000) found to be effective. In some current CORI classrooms collaborating teachers implement all aspects of CORI and in other classrooms teachers implement just the strategy instruction component. \*Illustrative Vignettes and Cases--Throughout the book vignettes and mini-case studies convey a situated view of instructional practices for reading comprehension and engagement. A detailed case study of one teacher and of the reading progress of her students is featured in one chapter. This book is appropriate for graduate and advanced undergraduate students in education and psychology, for practicing teachers, and for researchers in reading comprehension and motivation. management interventions and addresses two crucial aspects: how and under which conditions such interventions are responsible, and how such interventions can be supported by smart technologies. Responsible and Smart Land Management Interventions is for all types of actors in land management. Although primarily based on cases from Africa, it addresses land management issues from practical and theoretical perspectives relevant for land managers worldwide. It brings the discourse up to date and helps all practitioners designing new policies and those looking for new instruments to do so. Aimed at land academics, including students, teachers, and researchers, as well as practitioners, including those working within international organizations, donor organizations, NGOs, and land independent consultants, this book Delivers innovative methodologies for land management for professionals involved in land administration projects Explores land management from a geodetic and spatial planning perspective Includes real cases, empirical data, and analysis in contemporary and alternative land management developments in Africa Addresses important land issues which contribute to national development and achieving United Nations' SDGs Discusses contemporary research findings related to societal needs in land administration which are equally

Neonatal and Pediatric Respiratory Care, 6th Edition provides a solid foundation in the assessment and treatment of respiratory disorders in children. Clear, full-color coverage simplifies the concepts of respiratory care while emphasizing clinical application. Reflecting the changing face of this profession, this edition unpacks care strategies with coverage of the newest treatment algorithms, interventions, mechanical ventilation technologies, and more. From an expert team of contributors led by Brian K. Walsh, an experienced respiratory therapist and researcher, this text is an excellent study tool for the NBRC 's Neonatal/Pediatric Specialty examination. Authoritative, evidence-based content covers all of the major topics of respiratory care for neonates, infants, and children, including both theory and application, with an emphasis on an entry-level BS degree. Nearly 500 full-color illustrations — plus clear tables and graphs — make it easier to understand key concepts. Case studies include a brief patient history and questions for each, showing how concepts apply to the more difficult areas of care for neonatal and pediatric disorders.
