students for 80 years, and our proven strategies have helped legions of students achieve their dreams Government Printing Office Evolving Nationalism examines how the idea of Israel as a nation-state has developed within Zionist and Israeli discourse over the past eight decades. Nadav G. Shelef focuses on the changing ways in which the main nationalist movements answered three distinct questions in their private and public ideological articulations between 1925 and 2005: Where is the "Land of Israel"? Who ought to be Israeli? What should the Zionist national mission be? Framed within broader debates about

how and why changes in foundational definitions of the nation occur, Shelef's analysis centers on the mechanisms of ideological change and then subjects them to empirical scrutiny. He thus moves beyond the common but problematic assumptions that such transformations must be either a rare, rational adaptation to traumatic shock or a relatively constant product of manipulation by power-hungry elites. He finds that nationalist movements, including radical and religious fundamentalist ones, can and do change cardinal components of their ideological beliefs in both moderating and radicalizing directions. These changes have more to do with the unguided consequences of engagement in day-to-day politics than with strategic reaction to new realities, the use of force, or the changing incentives of leaders. Engaging with some of the most contentious debates about the nature of Israeli nationalism and the geographic, religious, and ethnic definition of the state of Israel, Shelef has made signal contributions to our

understanding of Middle East politics and of the ideological underpinnings of nationalism itself.

Heela Najibullah analyzes the Afghan reconciliation processes through the lenses of transnational peace philosophy and Elicitive Conflict Transformation. The research highlights two Afghan governments reconciliation processes in 1986 and 2010 and underlines the political events that shaped the 1986 National Reconciliation Policy, drawing lessons for future processes. The author points out the historical and geopolitical patterns indicating regional and global stakeholders involvement in Afghan politics. Social healing through a middle-out approach is the missing and yet crucial component to achieve sustainable reconciliation in Afghanistan

Reconceptualizing Literacy in the New Age of Multiculturalism and Pluralism IAP Grady E. Griffin knows all too well that the United States Postal Service is on the verge of financial collapse. It continues to lose billions of dollars per year, and it has reached its maximum federal borrowing limit of \$15 billion. Meanwhile, total liabilities are approaching \$100 billion. Griffin, who worked for the Postal Service in numerous roles, proposes common-sense solutions to the Postal Service's most pressing problems. These

solutions and other fixes are popular among working-level employees, but many managers, union officials, labor specialists, contract compliance officials, advocates for grievances, and arbitrators who make a living off interpreting complicated contracts continue to oppose them for selfish reasons. Tens of thousands of jobs are at stake, and a valuable service that the public relies on could be eliminated forever unless stakeholders overhaul the Postal Service.

Textbook of Neonatal Resuscitation New 7th Edition! Powerful resource for interactive, simulation-based teaching and learning! The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The Use of Simulated Neonatal Resuscitations
Purpose: The purpose of the study was to examine the relationship between participation in a simulated neonatal resuscitation on neonatal intensive care unit (NICU) nurses' knowledge of the Neonatal Resuscitation Program (NRP) guidelines and accuracy of the psychomotor skills required during resuscitation.
Design: An educational project design was used.
Method: NICU nurses employed at a regional hospital in Central Illinois were asked to complete a short, online survey, participate in a simulated resuscitation, and then complete the same online survey as before. Answers from before and after the simulation were compared and evaluated for knowledge of NRP.
Resuscitation skill performance was assessed during the hands-on session. (N = 10). Findings: Prior to participation in the simulated neonatal resuscitation, 90% of NICU nurses did not have complete knowledge of NRP guidelines (N=9). During the simulated resuscitation, one out of ten NICU nurses required correction on providing ventilation per NRP guidelines. After the hands-on portion of this project, only one of the then NICU nurses did not answer all NRP based

questions correctly (N=1). Conclusions: Participation in simulated neonatal resuscitation improves NICU nurses' knowledge of NRP and provides a safe place to practice and improve on resuscitation skills. Participation in simulated resuscitations should be implemented more frequently on nursing units to improve life-saving skills. Keywords: neonatal intensive care unit, Neonatal Resuscitation Program, simulated neonatal resuscitation -- Abstract.
