The book explores the relationship between Christology and theological anthropology through the lens provided by the theology of Karl Barth and the mind/body discussion in contemporary philosophy of mind. It thus comprises two major sections. The first develops an understanding of Karl Barth's theological anthropology focusing on three major facets: (1) the centrality of Jesus Christ for any real understanding of human persons; (2) the resources that such a christologically determined view of human nature has for engaging in interdisciplinary discourse; and (3) the ontological implications of this approach for understanding the mind/body relationship. The second part draws on this theological foundation to consider the implications that

Christological anthropology has for analyzing and assessing several prominent ways of explaining the mind/body relationship. Specifically, it interacts with two broad categories of theories: 'nonreductive' forms of physicalism and 'holistic' forms of dualism. After providing a basic summary of each, the book applies the insights gained from Barth's anthropology to ascertain the extent to which the two approaches may be considered christologically adequate.

Resuscitations Purpose: The purpose of the study was to examine the relationship between participation in a simulated neonatal resuscitation on neonatal intensive care unit (NICU) nurses' knowledge of the Neonatal Resuscitation Program (NRP) guidelines and accuracy of the psychomotor skills required during resuscitation. Design: An educational project design was used. Method: NICU nurses employed at a regional hospital in Central Illinois were asked to complete a short, online survey, participate in a simulated resuscitation, and then complete the same online survey as before. Answers from before and after the simulation were compared and evaluated for knowledge of NRP. Resuscitation skill performance was assessed during the hands-on session. (N = 10). Findings: Prior to participation in the simulated neonatal resuscitation, 90% of NICU nurses did not have complete knowledge of NRP guidelines (N=9). During the simulated resuscitation, one out of ten NICU nurses required

correction on providing ventilation per NRP guidelines. After the hands-on portion of this project, only one of the then NICU nurses did not answer all NRP based questions correctly (N=1). Conclusions: Participation in simulated neonatal resuscitation improves NICU nurses' knowledge of NRP and provides a safe place to practice and improve on resuscitation skills. Participation in simulated resuscitations should be implemented more frequently on nursing units to improve life-saving skills. Treasury, Postal Service, and general government appropriations for fiscal year 2003 The \$350 Billion Question Revenue Proposals in the President's Fiscal Year 2006 Budget Reconciliation and Social Healing in Afghanistan Evolving Nationalism examines how the idea of Israel as a nation-state has developed within Zionist and Israeli discourse over the past eight decades. Nadav G. Shelef focuses on the changing ways in which the main nationalist movements answered three

distinct questions in their private and public ideological articulations between 1925 and 2005: Where is the "Land of Israel"? Who ought to be Israeli? What should the Zionist national mission be? Framed within broader debates about how and why changes in foundational definitions of the nation occur, Shelef's analysis centers on the mechanisms of ideological change and then subjects them to empirical scrutiny. He thus moves beyond the common but problematic assumptions that such transformations must be either a rare, rational adaptation to traumatic shock or a relatively constant product of manipulation by power-hungry elites. He finds that nationalist movements, including radical and religious fundamentalist ones, can and do change cardinal components of their ideological beliefs in both moderating and radicalizing directions. These changes have more to do with the unguided consequences of engagement in day-to-day politics than with strategic reaction to new realities, the use of force, or the changing incentives of leaders. Engaging with some of the most contentious debates about the nature of Israeli nationalism and the geographic, religious, and ethnic definition of the state of Israel, Shelef has made signal contributions to our understanding of Middle East politics and of the ideological underpinnings of nationalism

itself.

The true story of Guatemala's political turmoil of the 1950s as only a master of fiction can tell it Guatemala, 1954. The military coup perpetrated by Carlos Castillo Armas and supported by the CIA topples the government of Jacobo Árbenz. Behind this violent act is a lie passed off as truth, which forever changes the development of Latin America: the accusation by the Eisenhower administration that Árbenz encouraged the spread of Soviet Communism in the Americas. Harsh Times is a story of international conspiracies and conflicting interests in the time of the Cold War, the echoes of which are still felt today. In this thrilling novel, Mario Vargas Llosa fuses reality with two fictions: that of the narrator, who freely re-creates characters and situations, and the one designed by those who would control the politics and the economy of a continent by manipulating its history. Harsh Times is a gripping, revealing novel that directly confronts recent history. No one is better suited to tell this riveting story than Vargas Llosa, and there is no form better for it than his deeply textured fiction. Not since *The Feast of the Goat*, his classic novel of the downfall of

Trujillo's regime in the Dominican Republic, has Vargas Llosa combined politics, characters, and suspense so unforgettably.

Grady E. Griffin knows all too well that the United States Postal Service is on the verge of financial collapse. It continues to lose billions of dollars per year, and it has reached its maximum federal borrowing limit of \$15 billion. Meanwhile, total liabilities are approaching \$100 billion. Griffin, who worked for the Postal Service in numerous roles, proposes common-sense solutions to the Postal Service's most pressing problems. These solutions and other fixes are popular among working-level employees, but many managers, union officials, labor specialists, contract compliance officials, advocates for grievances, and arbitrators who make a living off interpreting complicated contracts continue to oppose

them for selfish reasons. Tens of thousands of jobs are at stake, and a valuable service that the public relies on could be eliminated forever unless stakeholders overhaul the Postal Service.

The 2nd Edition of *Reconceptualizing Literacy in the New Age of Multiculturalism and Pluralism* honors the genius of Dr. Peter Mosenthal. His contributions to the field of literacy were unprecedented. Many described him as a superb researcher who never lost sight of the purpose of education. He made us laugh as he led us in a nursery rhyme song during his National Reading Conference (LRA) Presidential Address and made us think as he explained the significance of educational implications in all research articles. He also mentored and taught graduate students in gentle and carefully attentive ways, showing his respect and appreciation for the work of each individual in the field. He was a remarkable person. The second edition of this book includes many experienced and new scholars from around the world. Qualitative and quantitative research methodologies are scattered throughout and the practical and theoretical are well represented. *New Literacies and Global Perspectives* are added sections in this volume. In

this era of the "Common Core", *Reconceptualizing Literacy in the New Age of Multiculturalism and Pluralism*, presents a rational educational balance for literacy development across the curriculum.
