Very little communication takes place between most pastors/priests and their congregants regarding the weekly sermon/homily. This lack of constructive dialogue has resulted in Sunday messages that are not only out-of-touch with where parishioners are living, but for the most part what 's said isn 't remembered much beyond the church parking lot. Dr. Mains contends that people in the pew can best judge when a sermon is helpful to them and when it isn 't. So why not include them in the process of both preparing and evaluating sermons? Not preaching the sermons. . . .but again, preparing and evaluating them. He makes these changes sound so simple and practical that you can 't help but wonder, " Why weren 't these ideas implemented years ago? " Most people in the pew don 't realize how integral they are to finding a solution to this problem. But the pulpit/pew combination can be an incredibly powerful team, so let 's begin to work together to help solve this mystery of what 's happening to sermons. This is not a negative book or one that only points out problems. Instead, it 's a positive, practical and encouraging read that should fill you with hope for not only your local congregation, but churches everywhere.

[Fundamentals of Modern Manufacturing](#) Little, Brown Books for Young Readers

This book examines the way young adult readers are constructed in a variety of contemporary young adult fictions, arguing that contemporary young adult novels depict readers as agents. Reading, these novels suggest, is neither an unalloyed good nor a dangerous ploy, but rather an essential, occasionally fraught, by turns escapist and instrumental, deeply pleasurable, and highly contentious activity that has value far beyond the classroom skills or the specific content it conveys. After an introductory chapter that examines the state of reading and young adult fiction today, the book examines novels that depict reading in school, gendered and racialized reading, reading magical and religious books, and reading as a means to developing civic agency. These examinations reveal that books for teens depict teen readers as doers, and suggest that their ability to read deeply, critically, and communally is crucial to the development of adolescent agency.
