Problem solving is central to the teaching and learning of chemistry at secondary, tertiary and post-tertiary levels of education, opening to students and professional chemists alike a whole new world for analysing data, looking for patterns and making deductions. As an important higher-order thinking skill, problem solving also constitutes a major research field in science education. Relevant education research is an ongoing process, with recent developments occurring not only in the area of quantitative/computational problems, but also in qualitative problem solving. The following situations are considered, some general, others with a focus on specific areas of chemistry: quantitative problems, qualitative reasoning, metacognition and resource activation, deconstructing the problem-solving process, an overview of the working memory hypothesis, reasoning with the electron-pushing formalism, scaffolding organic synthesis skills, spectroscopy for structural characterization in organic chemistry, enzyme kinetics, problem solving in the academic chemistry laboratory, chemistry problem-solving in context, team-based/active learning, technology for molecular representations, IR spectra simulation, and computational quantum chemistry tools. The book concludes with methodological and epistemological issues in problem solving research and other perspectives in problem solving in chemistry. With a foreword by George Bodner.

As the magazine of the Texas Exes, The Alcalde has united alumni and friends of The University of Texas at Austin for nearly 100 years. The Alcalde serves as an intellectual crossroads where UT's luminaries - artists, engineers, executives, musicians, attorneys, journalists, lawmakers, and professors among them - meet bimonthly to exchange ideas. Its pages also offer a place for Texas Exes to swap stories and share memories of Austin and their alma mater. The magazine's unique name is Spanish for "mayor" or "chief magistrate"; the nickname of the governor who signed UT into existence was "The Old Alcalde."
Foundations of College Chemistry Chicago House Press
This text is an unbound, three hole punched version. Used by over 750,000 students, Foundations of College Chemistry, Binder Ready Version, 15th Edition is praised for its accuracy, clear no-nonsense approach, and direct writing style. Foundations' direct and straightforward explanations focus on problem solving making it the most dependable text on the market. Its comprehensive scope, proven track record, outstanding in-text examples and problem sets, were all designed to provide instructors with a solid text while not overwhelming students in a difficult course. Foundations fits into the prep/intro chemistry courses which often include a wide mix of students from science majors not yet ready for general chemistry, allied health students in their 1st semester of a GOB sequence, science education students (for elementary school teachers), to the occasional liberal arts student fulfilling a science requirement. Foundations was specifically designed to meet this wide array of needs.

In assembling Gildersleeve's writings-- autobiographical, Richmond Examiner newspaper editorials, and Southern essays, Briggs (classics and humanities, U. of South Carolina) brings to light the reflections of a U. of Virginia classics scholar during the Civil War. His classical rhetoric lends a novel twist to his loyalist but critical views on the South's "Good Cause," in chastising the Confederate administration as well as critics of slavery and Yankee poet "sinners" against the English language. Elegant and concise, this childhood memoir of Andy Grove, one of the pioneers of Silicon Valley, begins in Budapest, Hungary where the author was born into a secular Jewish family in 1936. As a small child, Andris Grof was told, "Jesus Christ was killed by the Jews, and because of that, all of the Jews will be thrown into the Danube." Grof's school years were marked by such anti-semitism and interrupted first by the Nazi occupation and then by the post-war Communist regime. He was a good student who excelled at chemistry which he was studying at the University of Budapest when the Hungarian uprising of 1956 persuaded him to "swim across" the border and emigrate to the West. Grove provides an interesting sketch of a boy's coming of age in a deeply dangerous 20th century Budapest under the control of Nazis and then Communists and concludes the memoir with an account of his escape and eventual resumption of his studies at the City College of New York. "Haunting and inspirational. It should be required reading in schools." — Tom Brokaw "A poignant memoir... a moving reminder of the meaning of America and the grit and courage of a remarkable young man who became one of America's phenomenal success stories." — Henry Kissinger "This honest and riveting account gives a fascinating insight into the man who wroteOnly the Paranoid Survive." — George Soros "Andy Grove is a tremendous role model, and his book sheds light on his amazing journey. I would choose him as my doubles partner any day!" — Monica Seles "Combines a unique and often harrowing personal experience with the virtues of fiction at its most engrossing — vivid scenes, sharply delineated characters, and an utterly compelling narrative... a wonderful reading experience." — Richard North Patterson "A poignant tale leading to human courage and hope." — Elie Wiesel "Grove, the founder and chairman of Intel Corporation,

does not whine about his hardships. Instead he recalls ordinary events and matter-of-factly juxtaposes these against the turmoil of midcentury Hungary, creating a subtle though compelling commentary on the power to endure." — Diane Scharper, The New York Times "Swimming Across tells the childhood stories [Grove] has guarded since first entering the public eye four decades ago... [It] is driven not by executives battling for money and power, but the experiences — some mundane, some extraordinary — of a nonobservant Jewish boy growing up in Hungary through a fascist regime, a Nazi invasion and a Soviet occupation." — Chris Gaither, The New York Times " The intelligence, dedication and ingenuity that earned him fame and fortune (he wasTime's Man of the Year in 1997) are evident early on... Grove's story stands smartly amid inspirational literature by self-made Americans" — Publishers Weekly "A tight, simply told, extremely intimate memoir... a polished, solid portrait of a particular time and place." — Kirkus "[A] moving and inspiring memoir... Grove's account of life in Hungary in the 1950s is a vivid picture of a tumultuous period in world history." — Booklist

Every librarian who teaches in an academic library setting understands the complexities involved in partnering with teaching faculty. Relationships Between Teaching Faculty and Teaching Librarians recounts the efforts of librarians and faculty working together in disciplines across the board to create and sustain connections crucial to the success of library instruction. This unique collection of essays examines various types of partnerships between librarians and faculty (networking, coordination, and collaboration) and addresses the big issues involved, including teaching within an academic discipline, the intricacies of assigning grades, faculty perceptions of library instruction, and the changing role of the reference librarian. Education is the main focus of reference service in today's academic libraries and librarians teach a variety of single-session, course-related, course-integrated, or credit-bearing courses in nearly every discipline. Relationships Between Teaching Faculty and Teaching Librarians reflects the experiences of librarians, teaching faculty, and library directors, whose perspectives range from cynicism to cautious optimism to idealism when it comes to working with teaching faculty. The book includes case studies, surveys, sample questionnaires, statistics, and a toolkit for establishing an effective library liaison program, and examines the teaching and learning environment, course growth and maintenance, and the "professor librarian" model. Relationships Between Teaching Faculty and Teaching Librarians presents lessons learned from seeking a common ground including: a successful faculty/librarian collaboration for educational psychology and counseling a library research project for freshman engineering students a semester-by-semester look at a collaboratively taught graduate research and writing course a survey that determines how librarians and library directors feel about teaching outside the library an analysis of librarians' attitudes toward faculty an analysis of attitudes that influence faculty collaboration in library instruction a look at innovative methods of increasing the teaching roles of librarians and much more! The Middle States Commission on Higher Education (MSA/CHE) has mandated that information literacy be included as part of a general education requirement. If your faculty wasn't calling for library instruction before the mandate, it probably is now. Relationships Between Teaching Faculty and Teaching Librarians will help librarians establish communication with faculty that provides a solid foundation for coursework in all disciplines.

Integrating Green and Sustainable Chemistry Principles into Education draws on the knowledge and experience of scientists and educators already working on how to encourage green chemistry integration in their teaching, both within and outside of academia. It highlights current developments in the field and outlines real examples of green chemistry education in practice, reviewing initiatives and approaches that have already proven effective.

By considering both current successes and existing barriers that must be overcome to ensure sustainability becomes part of the fabric of chemistry education, the book's authors hope to drive collaboration between disciplines and help lay the foundations for a sustainable future. This volume will focus on a much need comparison of science teacher preparation from around the world. In recent times (last 5 years) much has been written and communicated both in the popular press and within the annals of research oriented publications about the performance of students international in math and science. Although not a new discussion or debate, many countries are held as exemplars in how they educate their youth and subsequently how they educate their teachers. Given this situation and given the fact that there is ample evidence to show that some countries youth perform better on tests such as the Program for International Student Assessment (PISA) and we know that teacher significantly contribute to the performance of students, it is time that we look at the specific attributes of teacher preparation worldwide. Although this volume will not look at every country that is in the comparator group for PISA and other measures, we have contacted over 18 potential authors in the same number of countries in which there is ample evidence to show successes regarding student performance and quality teacher preparation programs. The intent of the book is not just to report on the “success” of each nation. Rather the intent is to ask authors to take a critical look at the process by which science teachers are educated and share with the reader both the positive and negative aspects of such preparation programs. For all 15 contributed chapters, the editors have analyzed each and from this constructed from the “data” an analysis and report in a final chapter on the exemplary qualities from various nations and make specific recommendations regarding science teacher preparation for the global community.

A Fractured Life, a true story, reveals Jane's childhood of loneliness, hunger, isolation, shame, and abandonment. When her mother died instantly and unexpectedly, six-year-old Jane was left in the care of her drunken and disinterested father. Without proper guidance, this child put herself in a dangerous situation, narrowly escaping a gang rape. Without supervision, she broke laws, which could have resulted in juvenile detention. Without love, she yearned for a new mother, only to struggle with a stepmother who was mentally ill. Without fear, she lived on her own through three years of high school, while excelling academically and socially. Jane traveled difficult and hazardous roads through childhood and adolescence in her hometown of Paducah, Kentucky. Though she did not recognize it as a child, God's daily presence protected her and provided her needs, leading her to a beautiful destination in adulthood. Through her memoir, you will learn to examine your daily life, seeing God's presence in every step you take. Your eyes will be opened to powerful blessings occurring in your life--right now, today. Discussion thoughts at the end of the book are excellent resources for book clubs or Bible classes.
