GoGetter is a new multi-level secondary course designed to inspire 21st Century learners and help them achieve their language goals. Exam practice is seamlessly integrated and innovative multimedia includes authentic BBC content which students can access in the classroom or at home.

Handbook of Sports Medicine and Science Intext Educational Publishers
Q Skills for Success encourages students to think critically and succeed academically. Q's question-centred approach provides a unique critical thinking framework for each unit. This develops key cognitive skills such as analyzing, synthesizing, and evaluating - as well as developing the language skills essential for academic success. Learning outcomes are clearly stated at the start and end of the units, with competency self-evaluations and vocabulary check lists featuring the Academic Word List. This enables teachers to define learning outcomes effectively to accreditation bodies.
Better Feedback for Better Teaching Teachers of English to

21st Century Reading was created through a partnership between TED, a nonprofit dedicated to spreading ideas through short, powerful talks and National Geographic Learning. 21st Century Reading provides the ideal forum for learners of English to make connections with topics ranging from science to business to global issues. Using TED Talks as the springboard to share ideas, this new four-level reading series shows learners how to understand and respond to ideas and content in English.

SpringBoard Read Books Ltd

"Robert Scholes has written an enviable book on the uses and abuses of literary theory in the teaching of literature. One of [his] most forceful points...is that 'literary theory' is not something a teacher may either 'use' or not use, for teaching itself is an unavoidably theoretical activity."--Gerald Graff, Novel "Scholes' emphasis in Textual Power is indicated by the book's

subtitle. After a provocative analysis of disciplinary values and departmental tendencies...[he] proposes that 'we must stop "teaching literature" and start studying texts'...His book is essential for college libraries."--R.C. Gebhardt, Choice "There is no issue more current, more relevant to the present scene, than the problem of pedagogy and its relation to contemporary theory. Textual Power is an important, provocative, and above all useful contribution to this discussion."--Gregory L. Ulmer Robert Scholes, author of Structuralism in Literature and Semiotics and Interpretation among other books, is Alumni-Alumnae University Professor of English and Comparative Literature at Brown University.

Atlanta Magazine Paw Prints

For years, educators have turned to the Hess Cognitive Rigor Matrices (CRM) when it comes to assessment. Now for the first time, the modules are packaged into one resource to help teachers evaluate the quality and premise of their current assessment system.

Educating children and leading them towards the path of bilingualism is a valuable and challenging task for any educator. Effective language teaching can contribute to young learners' cognitive growth, develop their problem-solving skills, enhance their comprehension abilities, and provide children with the satisfaction of succeeding in the challenge of learning a foreign language. All these issues must be taken under consideration when researching children and their teachers. The current literature indicates that further material is needed to provide professionals with different classroom situations and enhance the art of teaching children. Teaching Practices and Equitable Learning in Children's Language Education focuses on various perspectives of efficient practices, approaches, and ideas for professional development in the field of young language learners. The chapters in this book link the theoretical understanding and practical experience of teaching children languages by concentrating on

teaching practices, material design, classroom management, reading, speaking, writing, and more. This book is designed for inservice and preservice teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students interested in the field of early language learning and applied linguistics at large.

The Software Encyclopedia National Academies Press

Teachers, administrators, and education professors will find ideas that will transform classrooms into places where students are filled with confidence and empowered to strive for excellence.

Learning to Think Spatially Rowman & Littlefield Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

Q Skills for Success: Reading and Writing 5: Student Book with Online Practice Oxford University Press, USA

Learning to Think Spatially examines how spatial thinking might be incorporated into existing standards-based instruction across the school curriculum. Spatial thinking must be recognized as a fundamental part of K-12 education and as an integrator and a facilitator for problem solving across the curriculum. With advances in computing technologies and the increasing availability of geospatial data, spatial thinking will play a significant role in the information-based economy of the twenty-first century. Using appropriately designed support systems tailored to the K-12 context, spatial thinking can be taught formally to all students. A geographic information system

(GIS) offers one example of a high-technology support system that can enable students and teachers to practice and apply spatial thinking in many areas of the curriculum.
