The Defender of the Peace of Marsilius of Padua is a massively influential text in the history of western political thought. Marsilius offers a detailed analysis and explanation of human political communities, before going on to attack what he sees as the obstacles to peaceful human coexistence - principally the contemporary papacy. Annabel Brett's authoritative rendition of the Defensor Pacis was the first new translation in English for fifty years, and a major contribution to the series of Cambridge Texts: all of the usual series features are provided, included chronology, notes for further reading, and up-to-date annotation aimed at the student reader encountering this classic of medieval thought for the first time. This edition of The Defender of the Peace is a scholarly and a pedagogic event of great importance, of interest to historians, political theorists, theologians and philosophers at all levels from second-year undergraduate upwards.

What are you waiting for? ****Testimonials****I just wanted to drop you guys a line and tell you that I passed my final CLEP exam last Monday which gives me all of the credits I need to graduate. I have taken 30 credits worth of CLEP exams and I've passed them all by using your study guides. I actually purchased one of your study guides and failed my first test. I didn't fail because of your guide though, I failed because I didn't manage my time effectively and I ran short. I looked at your study guide after failing though, and a lot of the information on your study guide was very relevant to what was on the test. So, I tried again with a different test and a different study guide of yours. I passed. This pattern continues for 30 credits. I graduate on June 9th thanks to you guys, so I wanted to say thank you. The guides were worth every penny. Thanks, -John S.****I would like to thank you for your study guides. I will be graduating in December with two bachelor degrees and CLEP helped me get there quickly. I gained 36 credits through CLEP and your study guides helped me through almost all of them. I can honestly say that I would not have passed many of the tests without your guides. Great products.

Thanks!! -Erin W.****

All answers to exercises, quizzes and tests, plus worked out solutions. General Chemistry uses a mastery-learning method. In this method, students build comprehension by adding new concepts while reviewing and rehearsing key material throughout the year. This method is implemented in carefully crafted exercises, quizzes, and the textbook narrative, and it facilitates learning, mastery and retention. Students appreciate the smaller profile and lighter weight of our books. This is possible because of aspects of our Textbook Philosophy. When mastery is the goal, you must cull down the material to an amount that can reasonably be mastered in one year. Related subjects are integrated into the narrative. The history of modern chemistry, mathematics and technical communication is emphasized throughout. Integration protects a course from seeming compartmentalized from other subjects. That's certainly not how the real world is. Real chemists use math and writing skills every day. Their knowledge about how the scientific enterprise works is greatly enhanced by their knowledge of great scientists who came before. Our approach to implementing a Kingdom Perspective does not entail unnaturally inserting Bible verses or devotional insets. A better approach for Christians is to do science from the faith-informed perspective of disciples of Christ studying God's created order. This is apparent in General Chemistry from the observations about order in the universe, in how nature submits to scientific study and modeling, and in the fitness of creation as a habitat for humanity and animal life.

Co-published in association with Big Picture Learning. *Measuring Noncognitive Variables: Improving Admissions, Success, and Retention for Underrepresented Students* is written for admissions professionals, counselors, faculty and advisers who admit, teach, or work with students during the admissions process and post-enrollment period. It brings together theory, research and practice related to noncognitive variables in a practical way by using assessment methods provided at no cost. Noncognitive variables have been shown to correlate with the academic success of students of all races, cultures, and backgrounds. Noncognitive variables include personal and social dimensions, adjustment, motivation, and student perceptions, rather than the traditional verbal and quantitative areas (often called cognitive) typically measured by standardized tests. Key Features include: * Models that raise concepts related to innovation, diversity and racism in proactive ways * Examples of admission and post-enrollment applications that show how schools and programs can use noncognitive variables in a variety of ways * Additional examples from foundations, professional associations, and K-12 programs * An overview of the limitations of traditional assessment methods such as admission tests, grades, and courses taken. Education professionals involved in the admissions process will find this guide effectively informs their practice. This guide is also appropriate as a textbook in a range of courses offered in Higher Education and Student Affairs Masters and PhD programs.
