AP® Calculus AB & BC Crash Course Book + Online Effortless Math Education
www.EffortlessMath.com

We live immersed in what appears to be a paradox between coherence and complexity. It is the gap between the modern presuppositions we largely live by and the emerging presuppositions we are testing which makes this seem chaotic. It is the pull of the individual and the collective and their multi-layered discourses.

Handbook of Sexuality-Related Measures Schiffer Pub Limited

One day, third-grade teacher Kyle Schwartz asked her students to fill-in-the-blank in this sentence: "I wish my teacher knew ____." The results astounded her. Some answers were humorous, others were heartbreaking—all were profoundly moving and enlightening. The results opened her eyes to the need for educators to understand the unique realities their students face in order to create an open, safe and supportive place in the classroom. When Schwartz shared her experience online, #IWishMyTeacherKnew became an immediate worldwide viral phenomenon. Schwartz's book tells the story of #IWishMyTeacherKnew, including many students' emotional and insightful responses, and ultimately provides an invaluable guide for teachers, parents, and communities.

Every chapter in this innovative casebook places students in roles as practitioners handling simulated law practice problems; provides context in the form of an overview of the law, similar to that which an attorney would read before reading cases in a new subject area; includes questions designed to encourage students to find the applicable statutes and cases on point in the state where the student is planning to practice law; includes exercises, visual aids, and case reading scaffolds, designed to engage students with a wide range of learning styles; and ends with professionalism questions addressing ethical and professional identity questions suggested by the materials in the chapter. Contracts also includes a rolling graphic organizer that unfolds as students work through the text, as well as exercises designed to build students self-directed learning strategies. The comprehensive Teacher's Manual includes PowerPoint slides keyed to the text and dozens of multiple choice and essay questions (with answers and explanations) and is printed with a CD included. This book is part of the Context and Practice Series, edited by Michael Hunter Schwartz, Professor of Law and Dean of the University of Arkansas at Little Rock Bowen School of Law. This volume is a paperback edition of the original casebound title published in 2009. In April 2012, the Institute for the Advancement of the American Legal System recognized Professor Schwartz as an Educating Tomorrow's Lawyers fellow and his course as one that advances reform in legal education. "The contextual approach keeps students engaged and excited. The book balances traditional cases with wonderfully designed problems and exercises that get students to think (and often act) like lawyers." -- Stephen Friedman, Associate Professor of Law, Widener University School of Law "[This] is the first law school textbook I've seen where it is obvious that the authors really want to help students understand what they are supposed to be learning in the course. Right up front, the authors tell students the learning objectives of the course.... Students will find the book as intellectually challenging as any textbook they will encounter, but students who diligently work their way through the book should emerge with a solid understanding of contract law, and much more... I think it is a remarkably good textbook." -- Roy Stuckey, author of *Best Practices for Legal Education* (2007), in *The Law Teacher* "I had a chance to look at your Contracts casebook and I loved it! I will be using it next time I teach Contracts. Not only is it teaching/student oriented, I found it substantively to be very well thought out. KUDOS!" -- Roberto Corrada, University of Denver College of Law "I received this new casebook with great hope that it would be horrible so I wouldn't have to go through the ordeal of switching. Unfortunately, it is fantastic -- everything I've been looking for. After having revolutionized how to most effectively teach law students, Schwartz has produced an amazing doctrinal resource that will change how Contracts is taught. I truly believe this casebook and the marvelous teaching materials that accompany it now set the standard by which new casebooks should be judged." -- Bruce Price, University of San Francisco School of Law "[Contracts] is brilliant. The supplementary materials are plentiful (the CD and the TM). I really like the real world perspective with making it problem-based." -- Robin Boyle Laisure, St. Johns University School of Law

Inspiring Academics McGraw-Hill Education (UK)

The authors of *Make Just One Change* argue that formulating one's own questions is "the single most essential skill for learning" —and one that should be taught to all students. They also argue that it should be taught in the simplest way possible. Drawing on twenty years of experience, the authors present the Question Formulation Technique, a concise and powerful protocol that enables learners to produce their own questions, improve their questions, and strategize how to use them. *Make Just One Change* features the voices and experiences of teachers in classrooms across the country to illustrate the use of the Question Formulation Technique across grade levels and subject areas and with different kinds of learners.

Responses to Rembrandt Da Capo Lifelong Books

Whether we're buying a pair of jeans, ordering a cup of coffee, selecting a long-distance carrier, applying to college, choosing a doctor, or setting up a 401(k), everyday decisions—both big and small—have become increasingly complex due to the overwhelming abundance of choice with which we are presented. As Americans, we assume that more choice means better options and greater satisfaction. But beware of excessive choice: choice overload can make you question the decisions you make before you even make them, it can set you up for unrealistically high expectations, and it can make you blame yourself for any and all failures. In the long run, this can lead to decision-making paralysis, anxiety, and perpetual stress. And, in a culture that tells us that there is no excuse for falling short of perfection when your options are limitless, too much choice can lead to clinical depression. In *The Paradox of Choice*, Barry Schwartz explains at what point choice—the hallmark of individual freedom and self-determination that we so cherish—becomes detrimental to our psychological and emotional well-being. In accessible, engaging, and anecdotal prose, Schwartz shows how the dramatic explosion in choice—from the mundane to the profound challenges of balancing career, family, and individual needs—has paradoxically become a problem instead of a solution. Schwartz also shows how our obsession with choice encourages us to seek that which makes us feel worse. By

synthesizing current research in the social sciences, Schwartz makes the counter intuitive case that eliminating choices can greatly reduce the stress, anxiety, and busyness of our lives. He offers eleven practical steps on how to limit choices to a manageable number, have the discipline to focus on those that are important and ignore the rest, and ultimately derive greater satisfaction from the choices you have to make.

REA's Crash Course for the AP® Calculus AB & BC Exams - Gets You a Higher Advanced Placement® Score in Less Time 2nd Edition - Updated for the 2017 Exams Crash Course is perfect for the time-crunched student, the last-minute studier, or anyone who wants a refresher on the subject. Are you crunched for time? Have you started studying for your Advanced Placement® Calculus AB & BC exams yet? How will you memorize everything you need to know before the tests? Do you wish there was a fast and easy way to study for the exams AND boost your score? If this sounds like you, don't panic. REA's Crash Course for AP® Calculus AB & BC is just what you need. Our Crash Course gives you: Targeted, Focused Review - Study Only What You Need to Know The Crash Course is based on an in-depth analysis of the AP® Calculus AB & BC course description outline and actual AP® test questions. It covers only the information tested on the exams, so you can make the most of your valuable study time. Written by an experienced AP® Calculus instructor, the targeted review chapters prepare students for the test by only focusing on the topics tested on the AP® Calculus AB & BC exams. Our easy-to-read format gives students a crash course in AP® Calculus AB & BC and covers functions, graphs, units, derivatives, integrals, and polynomial approximations and series. Expert Test-taking Strategies Our author shares detailed question-level strategies and explain the best way to answer AP® questions you'll find on the exams. By following this expert tips and advice, you can boost your overall point score! Take REA's Practice Exams After studying the material in the Crash Course, go to the online REA Study Center and test what you've learned. Our free practice exams (one online for both Calculus AB and Calculus BC) features timed testing, detailed explanations of answers, and automatic scoring analysis. Each exam is balanced to include every topic and type of question found on the actual AP® exam, so you know you're studying the smart way. Whether you're cramming for the test at the last minute, looking for extra review, or want to study on your own in preparation for the exams - this is the study guide every AP® Calculus AB & BC student must have. When it's crucial crunch time and your Advanced Placement® exam is just around the corner, you need REA's Crash Course for AP® Calculus AB & BC!

Inspiring Academics draws on the experience and expertise of award-winning university teachers to help identify the approaches and strategies that lead to exemplary teaching practice. It is structured around five core themes: inspiring teaching, developing quality curricula, assessment for independent learning, student development and scholarship. Whilst celebrating individual teaching success, the book draws out core strategies which can be developed and replicated by others and which are not simply dependent on personal charisma and dynamism. Contributors reflect on approaches and initiatives that did not work for them, thus highlighting the inherent messiness and complexity of teaching and the difficulties of providing a blueprint for success. Contributors Gerlese À kerlind, Donna Boyd, Ian Cameron, Jane Dahlstrom, Brian Detweiler-Bedell, Jerusha Detweiler-Bedell, Lisa Emerson, Sally Fincher, Rhona Free, Iain Hay, Mick Healey, Welby Ings, David Kahane, Sally Kift, Dennis Krebs, TA Loeffler, Ursula Lucas, Roger Moltzen, Bernard Moss, Kate Regan, Wendy Rogers, Peter Schwartz, Fred Singer, Michael Wesch, Carl Wieman, Susan Wurtele

For the 2021 Exam! AP® Calculus AB & BC Crash Course A Higher Score in Less Time! REA's Crash Course quick-review study guide is the top choice for AP® students who want to make the most of their study time and earn a high score. Here's why more AP® teachers and students turn to REA's AP® Calculus Crash Course: Targeted, Focused Review — Study Only What You Need to Know. REA's new 3rd edition addresses all the latest test revisions. We cover only the information tested on the exam, so you can make the most of your valuable study time. Expert Test-taking Strategies and Advice. Authored by a team of AP® Calculus teachers, the book gives you the tips and topics that matter most on exam day. Crash Course relies on the authors' extensive analysis of the test's structure and content. By following their advice, you can boost your score in every section of the test. Realistic Practice Questions — a Mini-Test in the Book, a Full-Length Exam Online. Are you ready for your exam? Try our focused practice set inside the book. Then take our full-length online practice exam (one each for Calculus AB & BC) to ensure you're ready for test day. If you're cramming for the exam or looking for a concise course review, Crash Course is the study guide every AP® student needs. About Our Authors Joan Marie Rosebush teaches calculus courses at the University of Vermont. Ms. Rosebush has taught mathematics to elementary, middle school, high school, and college students. She taught AP® Calculus via satellite television to high school students scattered throughout Vermont. Ms. Rosebush earned her B.A. degree in elementary education, with a concentration in mathematics, at the University of New York in Cortland, N.Y. She received her Master's Degree in education from Saint Michael's College, Colchester, Vermont. Flavia Banu graduated from Queens College of the City University of New York with a B.A. in Pure Mathematics and an M.A. in Pure Mathematics in 1997. Ms. Banu was an adjunct professor at Queens College where she taught Algebra and Calculus II. Currently, she teaches mathematics at Bayside High School in Bayside, New York, and coaches the math team for the school. Her favorite course to teach is AP Calculus because it requires "the most discipline, rigor and creativity." About Our Revisions Editor Stu Schwartz has been teaching mathematics since 1973. For 35 years he taught in the Wissahickon School District, in Ambler, Pennsylvania, specializing in AP Calculus AB and BC and AP Statistics. Mr. Schwartz received his B.S. degree in Mathematics from Temple University, Philadelphia. Mr. Schwartz was a 2002 recipient of the Presidential Award for Excellence in Mathematics Teaching and also won the 2007 Outstanding Educator of the Year Award for the Wissahickon School District. Mr. Schwartz's resource-rich website, www.mastermathmentor.com, is geared toward helping educators teach AP® Calculus, AP® Statistics, and other math courses. Mr. Schwartz is always looking for ways to provide teachers with new and innovative teaching materials, believing that it should be the goal of every math teacher not only to teach students mathematics, but also to find joy and beauty in math as well.

[WJR](#), Research & Education Assoc.

In 1968, a group of Dutch scholars known as the Rembrandt Research Project, feeling that the master's oeuvre was inflated, began to take Rembrandt to task. The group's members traveled around the world, subjecting Rembrandt to intense scrutiny: they x-rayed paintings; examined the rendering of lace, hands, and signatures; counted threads of warp and woof. Paintings long considered Rembrandts started to fall. Then, in 1984, one of the members of the Project suggested, in print, that The Polish Rider might be next. Perhaps this painting, "one of the world's masterpieces," wasn't a Rembrandt after all but the work of a lesser-known pupil, Willem Drost.

Read Andrew Trees's posts on the Penguin Blog. A smart, entertaining, and eye-opening look at the science of love, publishing for Valentine's Day Relationships should be so simple. You meet someone. You fall in love. You live happily ever after. This "romantic story line" has shaped our thinking about relationships for centuries. But the fairy tale is deeply flawed, and researchers today are making shocking discoveries about how and why we choose the people we love. Drawing from the latest studies in economics, brain science, game theory, evolutionary psychology, and other fields, Decoding Love takes on a topic we all think we understand-how we fall in love-and illustrates that most of our assumptions are wrong. Along the way, Andrew Trees offers surprising new insights into the nature of attraction and desire, as well as an intimate look at the strange intersection of romance and the modern world of dating.

Described by reviewers as one of the most comprehensive and complete texts to be published in the

field in years, Teaching the Language Arts provides readers with a truly balanced approach to the teaching of language arts with an emphasis on the arts themselves. Written with the belief that all children and teachers possess creative potential, the author masterfully integrates essential elements of phonics instruction with critical principles of literature-based instruction, namely literature, comprehension, writing, and oral language. Cramer's engaging writing style leaves readers feeling as though they're in a conversation with the author? and clearly answers the question, "How can we teach Language Arts well??"
