(abridged and revised) This reference grammar offers intermediate and advanced students a reasonably comprehensive guide to the morphology and syntax of educated speech and plain prose in Spain and Latin America at the end of the twentieth century. Spanish is the main, usually the sole official language of twenty-one countries,} and it is set fair to overtake English by the year 2000 in numbers 2 of native speakers. This vast geographical and political diversity ensures that Spanish is a good deal less unified than French, German or even English, the latter more or less internationally standardized according to either American or British norms. Until the 1960s, the criteria of internationally correct Spanish were dictated by the Real Academia Espanola, but the prestige of this institution has now sunk so low that its most solemn decrees are hardly taken seriously - witness the fate of the spelling reforms listed in the Nuevas normas de prosodia y ortograjia, which were supposed to come into force in all Spanish-speaking countries in 1959 and, nearly forty years later, are still selectively ignored by publishers and literate persons everywhere. The fact is that in Spanish 'correctness' is nowadays decided, as it is in all living languages, by the consensus of native speakers; but consensus about linguistic usage is obviously difficult to achieve between more than twenty independent, widely scattered and sometimes mutually hostile countries. Peninsular Spanish is itself in flux.

A World of Many explores the world-making efforts of Tzotzil Maya children from two different localities within the municipality of Chenalhó, Chiapas. The research demonstrates children's agency in creating their worlds, while also investigating the role played by the surrounding social and physical environment. Different experiences with schooling, parenting, goals and values, but also with climate change, water scarcity, as well as racism and settler colonialism form part of the reason children create their emerging worlds. These worlds are not make believe or anything less than the ontological products of their parents. Instead, Norbert Ross argues that by creating different worlds, the children ultimately fashion themselves into different human beings - quite literally being different in the world. A World of Many combines experimental research from the cognitive sciences with critical theory, exploring children's agency in devising their own ontologies. Rather than treating children as somewhat incomplete humans, it understands children as tinkerers and thinkers, makers of their worlds amidst complex relations. It regards being as a constant ontological production, where life and living constitutes activism. Using experimental paradigms, the book shows that children locate themselves differently in these emerging worlds they create, becoming different human beings in the process.
