The book also discusses the effect of empire on global history and the many ways empire continues to manifest in the contemporary world. The contributors discuss world history as an intricate story of the connections within the global community, rather than a tidy, static narrative that attempts to summarize everything in our global past. In this volume the study of world history is presented as a constantly comparative endeavor, concerned with the major themes that link and divide humanity.

Learn from the Engagement Masters Education is a battle for attention. Whether you are a teacher trying to reach a classroom full of students or a parent trying to prepare your child for the world to come, getting our audience to just listen can be a real challenge. When students have access to personalized entertainment sitting in their pockets, anything that doesn't jump out and grab their attention right away is easily drowned out. But there is a place where even today all those modern distractions melt away--Disneyland. When you're there, you're not only in a different world, you're in Walt Disney's world. Whether you are Peter Pan flying over London in Fantasyland or a rebel fighter struggling against the First Order in Galaxy's Edge, you are 100% engaged. Sights, sounds and even smells ensure that your brain is locked into the experience. If we can bring those techniques into our teaching, we can create engaging experiences for our students, grab their attention, and boost their learning. You'll improve your teaching and create a place students want to visit. In this book we'll learn from the world's greatest engagement masters--the Disney Imagineers. Through narrative visits to attractions throughout Disneyland and Disney California Adventure, you'll experience a visit to the park as we share memories and see how the Imagineers make it all work. We'll be guided by Imagineering icon Marty Sklar's Mickey's 10 Commandments of Theme Park Design as we turn our classrooms into the most engaging places on Earth!

History Through the Eyes of Faith W. W. Norton & Company

History, if we define it as the mere transcription of the written records of former generations, can go no farther back than the time such records were first made, no farther than the art of writing. But now that we have come to recognize the great earth itself as a story-book, as a keeper of records buried one beneath the other, confused and half obliterated, yet not wholly beyond our

comprehension, now the historian may fairly be allowed to speak of a far earlier day. For unmeasured and immeasurable centuries man lived on earth a creature so little removed from "the beasts that die," so little superior to them, that he has left no clearer record than they of his presence here. From the dry bones of an extinct mammoth or a plesiosaur, Cuvier reconstructed the entire animal and described its habits and its home. So, too, looking on an ancient, strange, scarce human skull, dug from the deeper strata beneath our feet, anatomists tell us that the owner was a man indeed, but one little better than an ape. A few æons later this creature leaves among his bones chipped flints that narrow to a point; and the archæologist, taking up the tale, explains that man has become tool-using, he has become intelligent beyond all the other animals of earth. Physically he is but a mite amid the beast monsters that surround him, but by value of his brain he conquers them. He has begun his career of mastery.

A "lively and engaging" history of the Middle Ages (Dallas Morning News) from the acclaimed historian William Manchester, author of *The Last Lion*. From tales of chivalrous knights to the barbarity of trial by ordeal, no era has been a greater source of awe, horror, and wonder than the Middle Ages. In handsomely crafted prose, and with the grace and authority of his extraordinary gift for narrative history, William Manchester leads us from a civilization tottering on the brink of collapse to the grandeur of its rebirth: the dense explosion of energy that spawned some of history's greatest poets, philosophers, painters, adventurers, and reformers, as well as some of its most spectacular villains. "Manchester provides easy access to a fascinating age when our modern mentality was just being born." --Chicago Tribune

Black Africans in Renaissance Europe Routledge
This highly original book opens up the almost entirely neglected area of the black African presence in Western Europe during the Renaissance. Covering history, literature, art history and anthropology, it investigates a whole range of black African experience and representation across Renaissance Europe, from various types of slavery to black musicians and dancers, from real and symbolic Africans at court to the views of the Catholic Church, and from writers of African descent to Black African criminality. Their findings demonstrate the variety and complexity of black African life in fifteenth and sixteenth-century Europe, and how it was affected by firmly held preconceptions relating to the African continent and its inhabitants, reinforced by Renaissance ideas and conditions. Of enormous importance both for European and American history, this book mixes empirical material and theoretical approaches, and addresses such issues as

stereotypes, changing black African identity, and cultural representation in art and literature.
