This book challenges the orthodox approach to the teaching of second language listening, which is based upon the asking and answering of comprehension questions. The book's central argument is that a preoccupation with the notion of 'comprehension' has led teachers to focus upon the product of listening, in the form of answers to questions, ignoring the listening process itself. The

author provides an informed account of the psychological processes which make up the skill of listening, and analyses the characteristics of the speech signal from which listeners have to construct a message. Drawing upon this information, the book proposes a radical alternative to the comprehension approach and provides for intensive small-scale practice in aspects of listening that are perceptually or cognitively demanding for the learner. Listening in the Language Classroom was winner of the Ben Warren International Trust House Prize in 2008.

In this grand and astonishing tale, Alec Wilkinson brings us the story of S. A. Andrée, the visionary Swedish aeronaut who, in 1897, during the great age of Arctic endeavor, left to discover the North Pole by

flying to it in a hydrogen balloon. Called by a British military officer "the most original and remarkable attempt ever made in Arctic exploration," Andrée's expedition was followed by nearly the entire world, and it made him an international legend. The Ice Balloon begins in the late nineteenth century, when nations, compelled by vanity, commerce, and science, competed with one another for the greatest discoveries, and newspapers covered every journey. Wilkinson describes how in Andrée several contemporary themes intersected. He was the

first modern explorer—the first to depart for the Arctic unencumbered by notions of the Romantic age, and the first to be equipped with the newest technologies. No explorer had ever left with more uncertainty regarding his fate, since none had ever flown over the horizon and into the forbidding region of ice. In addition to portraying the period, *The Ice Balloon* gives us a brief history of the exploration of the northern polar regions, both myth and fact, including detailed versions of the two record-setting expeditions just prior to Andrée's—one led by U.S. Army lieutenant Adolphus Greely from Ellesmere Island; the other by Fridtjof Nansen, the Norwegian explorer who initially sought to reach the pole by embedding his ship in the pack ice and drifting toward it with the current. Woven throughout is Andrée's own history, and how he came by his brave and singular idea. We also get to know Andrée's family, the woman who loves him, and the two men who accompany him—Nils Strindberg, a cousin of the famous playwright, with a tender love affair of his own, and Knut Fraenkel, a willing and hearty young man. Andrée's flight and

the journey, based on the expedition's diaries and photographs, dramatically recovered thirty-three years after the balloon came down, along with Wilkinson's research, provide a book filled with suspense and adventure, a haunting story of high ambition and courage, made tangible with the detail, beauty, and devastating conditions of traveling and dwelling in "the realm of Death," as one Arctic explorer put it.

The Earth Dragon Awakes CSIRO PUBLISHING
New York Times Bestseller
In the most ambitious one-volume American history in decades, award-winning historian and New Yorker writer Jill Lepore offers a magisterial account of the origins and rise of a divided nation, an urgently needed reckoning with the beauty and tragedy of American history. Written in elegiac prose, Lepore's groundbreaking investigation

places truth itself—a devotion to facts, proof, and evidence—at the center of the nation's history. The American experiment rests on three ideas—"these truths," Jefferson called them—political equality, natural rights, and the sovereignty of the people. And it rests, too, on a fearless dedication to inquiry, Lepore argues, because self-government depends on it. But has the nation, and democracy itself, delivered on that promise? *These Truths* tells this uniquely American story, beginning in 1492, asking whether the course of events over more than five centuries has proven the nation's truths, or belied them. To answer that question, Lepore traces the intertwined histories of American politics, law, journalism, and technology, from the colonial town meeting to the nineteenth-century party machine, from talk radio to twenty-first-century Internet polls, from Magna Carta to the Patriot Act, from the printing press to Facebook News. Along the way, Lepore's sovereign chronicle is filled with arresting sketches of both well-known and lesser-known Americans, from a parade of

presidents and a rogues' gallery of political mischief makers to the intrepid leaders of protest movements, including Frederick Douglass, the famed abolitionist orator; William Jennings Bryan, the three-time presidential candidate and ultimately tragic populist; Pauli Murray, the visionary civil rights strategist; and Phyllis Schlafly, the uncredited architect of modern conservatism. Americans are descended from slaves and slave owners, from conquerors and the conquered, from immigrants and from people who have fought to end immigration. "A nation born in contradiction will fight forever over the meaning of its history," Lepore writes, but engaging in that struggle by studying the past is part of the work of citizenship. "The past is an inheritance, a gift and a burden," These Truths observes. "It can't be shirked. There's nothing for it but to get to know it."

individuality in this humorous tale from the
author of Pookins Gets Her Way. Tacky is an
odd bird. He likes to do splashy cannonballs and

perfect penguins to save the day. Thank goodness

By the #1 New York Times bestselling author of
Killers of the Flower Moon, a powerful true story of
adventure and obsession in the Antarctic, lavishly

illustrated with color photographs Henry Worsley was a devoted husband and father and a decorated British special forces officer who believed in honor and sacrifice. He was also a man obsessed. He spent his life idolizing Ernest Shackleton, the nineteenth-century polar explorer, who tried to become the first person to reach the South Pole, and later sought to cross Antarctica on foot. Shackleton never completed his journeys, but he repeatedly rescued his men from certain death, and emerged as one of the greatest leaders in history. Worsley felt an overpowering connection to those expeditions. He was related to one of Shackleton's men, Frank Worsley, and spent a fortune collecting artifacts from their epic treks across the continent. He modeled his military command on Shackleton's legendary skills and was determined to measure his own powers of endurance against them. He would succeed where Shackleton had failed, in the most brutal landscape in the world. In 2008, Worsley set out across Antarctica with two other descendants of Shackleton's crew, battling the freezing, desolate landscape, life-threatening physical exhaustion, and hidden crevasses. Yet when he returned home he felt compelled to go back. On November 13, 2015, at age 55, Worsley bid farewell to his family and embarked on his most perilous quest: to walk across Antarctica alone. David Grann tells Worsley's remarkable story with the intensity and power that have led him to be called "simply the best narrative nonfiction writer working today." Illustrated with more than fifty stunning photographs from Worsley's and Shackleton's journeys, *The White Darkness* is both a gorgeous keepsake volume and a spellbinding story of courage, love, and a man pushing himself to the extremes of human capacity.
