The topic can be on anything and
that is why it can relate to any of
the other content areas. Math: For
math there are different ways a
teacher can use an anticipation
guide. For example when students
are learning about a new concept,
ex: geometric figures, the teacher
can have a set of statements.

This student is anticipating
what he or she is about to
read. Here is an anticipation
guide that is used for math.
Students answer true and false
statements before they learn
about geometry. After the
geometry unit, students
answer the same statements.
By doing this anticipation
guide, students can see what
they need to learn throughout

the unit and it activates their
prior knowledge.

An anticipation guide is a
comprehension strategy that
is used before reading to
activate students' prior
knowledge and build curiosity
about a new topic. Before
reading, students listen to or
read several statements about
key concepts presented in the
text; they're often structured
as a series of statements with
which the students can choose
to agree or disagree.
