In her new book, prominent professional developer Yvette Jackson focuses on students' strengths, rather than their weaknesses, to reinvigorate educators to inspire learning and high intellectual performance. Through the lens of educational psychology and historical reforms, Jackson responds to the faltering motivation and confidence of educators in terms of its effects on closing the achievement gap. The

author seeks to rekindle the belief in the vast capacity of underachieving urban students, and offers strategies to help educators inspire intellectual performance. Jackson proposes that a paradigm shift towards a focus on strengths will reinvigorate educators passion for teaching and belief in their ability to raise the intellectual achievement of their students. Jackson addresses how educators can systematically support the development of motivation, reflective and cognitive skills, and high performance when standards and assessments are predisposed to non-conceptual methods. Furthermore, she examines challenges and offers strategies for dealing with cultural disconnects, the influence of new technologies, and language preferences of students.

"As elegantly practical as it is theoretically elegant. It is a guided tour, as one examines the tools of expert teachers as they engage students in a journey that is aptly dubbed Reading Apprenticeship—learning how to become a savvy, strategic reader under the tutelage of thoughtful, caring, and demanding teachers." P. David Pearson, University of California, Berkeley, and founding editor of the Handbook of Reading Research. Reading for Understanding is a monumental achievement. It was a monumental achievement when it came out as a first edition in 1999, bringing years of rigorous reading research together in a framework for teaching that made sense in actual secondary school classrooms. Now, just thirteen years later, Schoenbach and Greenleaf have several randomized clinical trials and multiple on-going studies at their fingertips to demonstrate the effects of this approach for developing the reading and thinking of young people in our nation's middle and high school classrooms, as well as in community college classrooms. Their careful work on developing disciplinary literacy among all students represents a passion for and commitment to supporting students—and their teachers—in reading for understanding, which translates to reading for enjoyment, self-awareness, learning, and for purposeful and informed action in our society. —Elizabeth Moje, Arthur F. Thurnau Professor and Associate Dean for Research, School of Education, University of Michigan

Reading Apprenticeship has proven to be an inspiration to Renton Technical College faculty and students alike. They have learned together to view themselves as readers in transformative ways, as they embrace powerful techniques to increase reading comprehension. The ideas and strategies in Reading for Understanding anchor this new and broad-based energy around reading and an enthusiasm among our faculty to model effective reading strategies for our students. —Steve Hanson, President, Renton Technical College, Renton, Washington

Reading for Understanding has the finest blend I have seen of research, strategies, and classroom vignettes to deepen teacher learning and help them connect the dots between theory and practice. —Curtis Refior, Content Area Literacy Coach, Fowlerville Community Schools, Fowlerville, Michigan

A teacher-tested, research-based resource for dramatically improving reading skills Published in partnership with WestEd, this significantly updated second edition of the bestselling book contains strategies for helping students in middle school through community college gain the reading independence to master subject area textbooks and other material. Based on the Reading Apprenticeship program, which three rigorous "gold standard" research studies have

shown to be effective in raising students' reading achievement Presents a clear framework for improving the reading and subject area learning of all students, including English learners, students with special needs, as well as those in honors and AP courses Provides concrete tools for classroom use and examples from a range of classrooms Presents a clear how-to for teachers implementing the subject area literacies of the Common Core Standards Reading for Understanding proves it's never too late for teachers and students to work together to boost literacy, engagement, and achievement.

A heartbreaking and powerful story about a black boy killed by a police officer, drawing connections through history, from award-winning author Jewell Parker Rhodes. Only the living can make the world better. Live and make it better. Twelve-year-old Jerome is shot by a police officer who mistakes his toy gun for a real threat. As a ghost, he observes the devastation that's been unleashed on his family and community in the wake of what they see as an unjust and brutal killing. Soon Jerome meets another ghost: Emmett Till, a boy from a very different time but similar circumstances. Emmett helps Jerome process what has happened, on a journey towards recognizing how historical racism may have led to the events that ended his life. Jerome also meets Sarah, the daughter of the police officer, who grapples with her father's actions. Once again Jewell Parker Rhodes deftly weaves historical and socio-political layers into a gripping and poignant story about how children and families face the complexities of today's world,

and how one boy grows to understand American blackness in the aftermath of his own death.

But all the kids are wearing them! Any child who has ever craved something out of reach will relate to this warm, refreshingly realistic story. Features an audio read-along. "I have dreams about those shoes. Black high-tops. Two white stripes." All Jeremy wants is a pair of those shoes, the ones everyone at school seems to be wearing. But Jeremy's grandma tells him they don't have room for "want," just "need," and what Jeremy needs are new boots for winter. When Jeremy's shoes fall apart at school, and the guidance counselor gives him a hand-me-down pair, the boy is more determined than ever to have those shoes, even a thrift-shop pair that are much too small. But sore feet aren't much fun, and Jeremy comes to realize that the things he has -- warm boots, a loving grandma, and the chance to help a friend -- are worth more than the things he wants.

Background: Teachers who work with English as a Second Language (ESL) students, struggle with promoting discussion during guided reading. When ESL students are asked comprehension questions during group discussions and throughout the reading of a book, often teachers receive minimal feedback. Purpose: The purpose of this research is to identify effective discussion strategies that may help ESL students contribute to meaningful class discussions about their reading.

Setting: The students in the research attended a public elementary school in a suburban neighborhood in northeastern United States.

The research took place in a third grade classroom for approximately one month. Study Sample: The students in the research were two boys and two girls in third grade. They participated in the school's ESL program. Intervention: Anticipation guides were implemented during guided reading twice. Four statements were created on sheets of paper that related to the story with columns for students to decide whether they agreed or disagreed. Strategies were modeled to illustrate

how students could respond to the first statement and how they could make connections to previous experiences. Students recorded their reactions to the statements, read the book, and had opportunities to discuss their responses. Research Design: Experimental. Data Collection and Analysis: The data collection includes a teacher survey and interview, guided reading pre & post observation notes, pre & post group discussion checklists, and student interviews. Findings: Anticipation guides brought forth high levels of discussion and were appreciated by the students, based on the student interviews and post strategy observation. It was easy for students to state their opinions on the statements included in the guides and refer back to them to discuss their reasons for agreeing or disagreeing. Conclusion: To narrow students' learning gaps, strategies that will allow for building background knowledge in students who bring diverse cultural differences should be implemented. Anticipation guides certainly build knowledge, motivation, comprehension, and discussion. Citation: Echevarria, J., & Short, D. (2004/2005).
