A heartbreaking and powerful story about a black boy killed by a police officer, drawing connections through history, from award-winning author Jewell Parker Rhodes. Only the living can make the world better.

Live and make it better. Twelve-year-old Jerome is shot by a police officer who mistakes his toy gun for a real threat. As a ghost, he observes the devastation that's been unleashed on his family and community in the wake of what they see as an unjust and brutal killing. Soon Jerome meets another ghost: Emmett Till, a boy from a very different time but similar circumstances. Emmett helps Jerome process what has happened, on a journey towards recognizing how historical racism

may have led to the events that ended his life. Jerome also meets Sarah, the daughter of the police officer, who grapples with her father's actions. Once again Jewell Parker Rhodes deftly weaves historical and socio-political layers into a gripping and poignant story about how children and families face the complexities of today's world, and how one boy grows to understand American blackness in the aftermath of his own death. The 100-Year-Old Secret Prentice Hall Background: Teachers who work with English as a Second Language (ESL) students, struggle with promoting discussion during guided reading. When ESL students are asked comprehension

questions during group discussions and throughout the reading of a book, often teachers receive minimal feedback. Purpose: The purpose of this research is to identify effective discussion strategies that may help ESL students contribute to meaningful class discussions about their reading. Setting: The students in the research attended a public elementary school in a suburban neighborhood in northeastern United States. The research took place in a third grade classroom for approximately one month. Study Sample: The students in the research were two boys and two girls in third grade. They participated in the school's ESL program.

Intervention: Anticipation guides were implemented during guided reading twice. Four statements were created on sheets of paper that related to the story with columns for students to decide whether they agreed or disagreed. Strategies were modeled to illustrate how students could respond to the first statement and how they could make connections to previous experiences. Students recorded their reactions to the statements, read the book, and had opportunities to discuss their responses. Research Design: Experimental. Data Collection and Analysis: The data collection includes a teacher survey and interview, guided reading pre & post

observation notes, pre & post group discussion checklists, and student interviews. Findings: Anticipation guides brought forth high levels of discussion and were appreciated by the students, based on the student interviews and post strategy observation. It was easy for students to state their opinions on the statements included in the guides and refer back to them to discuss their reasons for agreeing or disagreeing. Conclusion: To narrow students' learning gaps, strategies that will allow for building background knowledge in students who bring diverse cultural differences should be implemented.

"need," and what Jeremy needs are new boots for winter. The Boy Who Invented TV

Teacher Created Materials
In her new book,

prominent professional developer Yvette Jackson focuses on students' strengths, rather than their weaknesses, to reinvigorate educators to inspire learning and high intellectual performance. Through the lens of educational psychology and historical reforms, Jackson responds to the faltering motivation and confidence of educators in terms of its effects on closing the achievement gap. The author seeks to rekindle the belief in the vast

capacity of underachieving urban students, and offers strategies to help educators inspire intellectual performance. Jackson proposes that a paradigm shift towards a focus on strengths will reinvigorate educators passion for teaching and belief in their ability to raise the intellectual achievement of their students. Jackson addresses how educators can systematically support the development of motivation, reflective and cognitive skills, and

high performance when standards and assessments are predisposed to non-conceptual methods.

Furthermore, she examines challenges and offers strategies for dealing with cultural disconnects, the influence of new technologies, and language preferences of students.
