Animal Behavior AP Lab 11

Introduction: Ethology is the study of animal behavior. This involves observing an organism's behaviors, interpreting what is observed, and research different organisms.

Ethologists study and observe an organism's reaction to the environment around them. Biotic and abiotic factors are limiting factors that control the maximum size of a ...

AP Biology Lab 11: Animal Behavior

This will be helpful when the students are asked to design their own controlled experiment in the last portion of the lab—probably the most important part! (See The Lab Bench at The Biology Place, www.biology.com, for more information.)"

—Theresa Holzclaw, Clinton, Tennessee.

Lab 11 Animal Behavior

Introduction: Ethology is the study of animal behavior. An animal's behavior is its response to sensory input. There are three types of behaviors: orientation,

agonistic, and mating. Orientation behaviors take the animal to its most favorable environment. Taxis is when an animal moves toward or away from a stimulus. ...
