"Steven and Susan Zumdahl's CHEMISTRY 8e brings together the solid pedagogy, easy-to-use media, and interactive exercises that today's instructors need for their general chemistry course. Rather than rote memorization, CHEMISTRY emphasizes a thoughtful approach built on problem-solving. For the Eighth Edition, the authors have extended this approach by emphasizing problem-solving strategies within the Examples and throughout the text narrative. The text speaks directly to the student about how to approach and solve chemical problems--to learn to think like a chemist--so that they can apply the process of

problem-solving to all aspects of their lives. Students are provided with the tools to become critical thinkers: to ask questions, to apply rules and develop models, and to evaluate the outcome."--pub. desc.

General Chemistry:

Understanding Moles, Bonds, and Equilibria Student Solution Manual, Volume 1 is a companion solution manual to General Chemistry:

Understanding Moles, Bonds, and Equilibria, Volume 1.

Original problems from the textbook are included alongside detailed explanations and useful base knowledge required to successfully solve each problem. The material in this manual implements the innovative presentation of the material given in the companion textbook.

Unlike nearly all chemistry solution manuals on the market, this volume is written by one of the textbook authors. This solutions manual can also be used as a source of additional

problems to supplement any foundational chemistry text or course, including AP chemistry. It provides students with ample opportunity to build knowledge and mastery of basic chemistry concepts.
