Human Geography Barron's Educational Series  
Human Geography: Culture, Society and Space challenges students to think geographically across scale and across a wide range of geographical phenomena and global issues. The authors engage the students throughout the text by posing geographical questions that encourage

---

students to think critically about their own locality, region, nation, and world. In the Eighth Edition, the authors reformat the text to 14 chapters, provide a clear outline of key questions for each chapter, integrate their own field experiences, and rewrite the text to guide students through answers to geographic questions. The Eighth Edition includes three new chapters: "Identity: Race, Ethnicity and Gender," "Local Culture, Popular Culture, and Cultural Landscapes," and "Geographic Networks." The concepts of globalization,

identity, development, sense of place, and construction of scale are infused throughout the text. The author team draws from studies in geography and across disciplines to bring a broad and up-to-date perspective on the kinds of research geographers have done and are currently doing on a wide range of human geography topics. In the Eighth Edition, de Blij and Murphy welcome new coauthor Erin Hogan Fouberg (South Dakota State University), who brings her expertise in geography education and political geography. The author team created a new pedagogy and writing style for

---

the Eighth Edition that make the book more accessible to students and faculty.

Remittances remain a key source of funds for developing countries, far exceeding official development assistance and even foreign direct investment. Remittances have proved to be more stable than private debt and portfolio equity flows, and less volatile than official aid flows, and their

annual flow can match or surpass foreign exchange reserves in many small countries. Even in large emerging markets, such as India, remittances are equivalent to at least a quarter of total foreign exchange reserves. India, China, Philippines and Mexico are the top recipients of migrant remittances. The Migration and Remittances Factbook 2016 attempts to present numbers and facts behind the stories of international migration and remittances, drawing on authoritative, publicly available data. It provides a snapshot of statistics on immigration, emigration, skilled emigration, and remittance flows for 210 countries and 15 regional and income groups. The Migration and Remittances Factbook 2016 updates the 2011 edition of the Factbook with additional data on bilateral migration and remittances and second generation diasporas, collected from various sources, including national censuses, labor force surveys, population registers, and other national sources.

This AP\* Human Geography companion is filled with vocab, activities and assignments that follow Rubenstein's Cultural Landscape Twelfth Edition+ for all 13 chapters. Its activities can be used as regular weekly assignments or reviews. They can be used on short notice if there is a sub, or be assigned as regular homework. All you need is the textbook. Teachers can copy at will, or use the book as a student consumable. The rationale for having a workbook like this is that as publishers began putting much of their extra content online, a niche for traditional classwork was opened. Also, whether the textbook itself is written in ink or electrons, many students still find it valuable to write and keep notes for themselves on paper, and portfolios still matter.

The activities in this workbook challenge students to apply the concepts, give examples, diagram every chapter, and think things through. Find TTT on FB.

First published forty years ago and still widely referenced, Edward Relph's *Place and Placelessness* has taken its place as a classic of the phenomenological approach to the study of place and has influenced a generation of scholars. For this reprint Professor Relph has written a new introduction setting his original work in its contemporary context. He shows how the concepts of place have been modified

and yet continue to be of vital importance in interpreting a world which travel and commerce have made very different from that of 1976. In his words: "sense of place has the potential to serve as a pragmatic foundation for addressing the profound local and global challenges, such as climate change and economic disparity, that are emerging in the present century."
