The AP Statistics course is equivalent to a first-semester, college-level class in statistics. The 3-hour, end-of-course exam is comprised of 46 questions, including 40 multiple-choice questions (50% of the exam) and 6 free-response questions (50% of the exam). The exam covers the following course content categories:

AP Statistics: Chapter Notes from - Dan Shuster

$P(A)$ = number of outcomes in event A / total number of outcomes in the sample space. The probability of any event is a number between 0 and 1 (proportion). All possible outcomes MUST add up to 1. The probability that an event does not occur is 1 minus the probability that it does occur. In other words, this refers to the complement rule which says that $P(AC) = 1 - P(A)$ where $P(AC)$ is the complement of event A or the probability that event A doesn't occur.
