"This textbook takes a systematic approach to teaching broadcast and multimedia journalism to students. Easy to follow [and] very relatable for students. Visually appealing...Love this textbook." —Beth Bingham Georges, California State University, Fullerton Updated Edition of Bestseller! It's a multimedia world, and today's journalists must develop a multimedia mindset. How does this way of thinking change the newsgathering and news production processes? Having conceived of and written their book in this changed media landscape, broadcast veterans Wenger and Potter seamlessly build on the fundamentals of good news reporting while teaching students to use depth, interactivity and immediacy as they maximize the advantages of each platform. While retaining the book's clear instruction and advice from those in the trenches, *Advancing the Story*, Fourth Edition has been updated to reflect the latest issues and trends with: greater emphasis on social media and mobile media to gather, promote and disseminate news content; expanded coverage of media ethics and media law; extended examples of effective reporting across multiple platforms; updated writing exercises and new resources for reviewing AP style; and additional interviews with journalists at the forefront of industry changes. Visit [study.sagepub.com/advancingthestory](http://study.sagepub.com/advancingthestory) for interactive chapter modules, skill-building tutorials, and analysis from journalism experts. Instructors! Earn College Credit with REA's Test Prep for CLEP® College Mathematics Everything you need to pass the exam and get the college credit you deserve. REA's CLEP® test preps are perfect for adults returning to college (or attending for the first time), military service members, high-school graduates looking to earn college credit, or home-schooled students with knowledge that can translate into college credit. Our test prep for CLEP® College Mathematics and the free online tools that come with it, allow you to create a personalized CLEP® study plan that can be customized to fit you: your schedule, your learning style, and your current level of knowledge. Diagnostic exam at the REA Study Center focuses your study Our online diagnostic exam pinpoints your strengths and shows you exactly where you need to focus your study. Armed with this information, you can personalize your prep and review where you need it the most. The most complete subject review for CLEP® College

Mathematics The CLEP® College Mathematics exam covers material taught in a college course for non-mathematics majors. Written by a math expert, REA's comprehensive review covers all the topics found on the exam: algebra and functions, counting and probability, data analysis and statistics, logic and sets, financial mathematics, numbers, and geometry. Two full-length practice exams The online REA Study Center gives you two full-length practice tests and the most powerful scoring analysis and diagnostic tools available today. Instant score reports help you zero in on the CLEP® College Math topics that give you trouble now and show you how to arrive at the correct answer - so you'll be prepared on test day. REA is the acknowledged leader in CLEP® preparation, with the most extensive library of CLEP® titles available. Our test preps for CLEP® exams help you earn valuable college credit, save on tuition, and get a head start on your college degree. Start earning college credit with CLEP®! Multiple Choice and Free Response Questions in Preparation for the AP Statistics Examination (2nd Edition) Brooks/Cole Publishing Company This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Clear, accessible, and teachable, *Stats: Modeling the World* leads with practical data analysis and graphics to engage students and get them thinking statistically from the start. Through updated, relevant examples and data—and the authors' signature Think, Show, and Tell problem-solving method—students learn what we can find in data, why we find it interesting, and how to report it to others. The new Fourth Edition is even more engaging than previous editions, builds on the innovative features that have made the first three editions so popular, and includes revisions designed to make it even easier for students to put the concepts of statistics together in a coherent whole.

STATISTICS: LEARNING FROM DATA, Second Edition, helps you learn to think like a statistician. It pays particular attention to areas that students often struggle with -- probability, hypothesis testing, and selecting an appropriate method of analysis. Supported by learning objectives, real-data examples and exercises, and technology notes, this book helps you to develop conceptual understanding, mechanical proficiency, and the ability to put knowledge into practice. Statistics for People Who (Think They) Hate Statistics Cengage Learning Offering a unique and powerful way to introduce the principles of statistical reasoning, *Statistical Reasoning in Sports* features engaging examples and a student-friendly approach. Starting from the very first chapter, students are able to ask questions, collect and analyze data, and draw conclusions using randomization tests. Is it harder to shoot free throws with distractions? We explore this question by designing an experiment, collecting the data, and using a hands-on simulation to analyze results. Completely covering the Common Core Standards for Probability and Statistics, *Statistical Reasoning in Sports* is an accessible and fun way to learn about statistics!

Roxy Peck, Chris Olsen and Jay Devore's new edition uses real data and attention-grabbing examples to introduce students to the study of statistical output and methods of data analysis. Based on the best-selling *STATISTICS: THE EXPLORATION AND ANALYSIS OF DATA*, Fifth Edition, this new *INTRODUCTION TO STATISTICS AND DATA ANALYSIS*, Second Edition integrates coverage of the graphing calculator and includes expanded coverage of probability. Traditional in structure yet modern in approach, this text guides students through an intuition-based learning process that stresses interpretation and communication of statistical information. Conceptual comprehension is cemented by the simplicity of notation--frequently substituting words for symbols. Simple notation helps students grasp concepts. Hands-on activities and Seeing Statistics applets in each chapter allow students to practice statistics firsthand.

*Statistical Methods in the Atmospheric Sciences*, Third Edition, explains the latest statistical methods used to describe, analyze, test, and forecast atmospheric data. This revised and expanded text is intended to help students understand and communicate what their data sets have to say, or to make sense of the scientific literature in meteorology, climatology, and related disciplines. In this new edition, what was a single chapter on multivariate statistics has been expanded to a full six chapters on this important topic. Other chapters have also been revised and cover exploratory data analysis, probability distributions, hypothesis testing, statistical weather forecasting, forecast verification, and time series analysis. There is now an expanded treatment of resampling tests and key analysis techniques, an updated discussion on ensemble forecasting, and a detailed chapter on forecast verification. In addition, the book includes new sections on maximum likelihood and on statistical simulation and contains current references to original research. Students will benefit from pedagogical features including worked examples, end-of-chapter exercises with separate solutions, and numerous illustrations and equations. This book will be of interest to researchers and students in the atmospheric sciences, including meteorology, climatology, and other geophysical disciplines. Accessible presentation and explanation of techniques for atmospheric data summarization, analysis, testing and forecasting Many worked examples End-of-chapter exercises, with answers provided
