Confronting Prejudice and Discrimination: The Science of Changing Minds and Behaviors focuses on confrontation as a strategy for reducing bias and discrimination. The volume tackles questions that people face when they wish to confront bias: What factors influence people ' s decisions to confront or ignore bias in its various forms? What are the motives and consequences of confrontation? How can confrontation be approached individually, through education and empowerment, and in specific contexts (e.g., health care) to yield favourable outcomes? These questions are paramount in contemporary society, where confrontation of bias is increasingly evident. Moreover, great strides in the scientific study of confrontation in the past 20 years has yielded valuable insights and answers. This volume is an essential resource for students and researchers with an interest in prejudice and prejudice reduction, and will also be valuable to non-academics who wish to stand up to bias through confrontation. Addresses factors that determine individuals ' decisions to confront stereotyping, prejudice and discrimination Analyzes how personal and collective motives shape responses in

confrontation-relevant situations Examines the consequences of confrontation from the perspectives of targets, perpetrators and bystanders Provides a roadmap for how to prepare for and engage in successful confrontations at the individual level Covers confronting bias in various settings including in schools, health care, the workplace and on the internet Discusses confrontation in the context of racism, sexism, sexual harassment and other forms of bias, including intersectional forms of bias

This collection of thirty-four major essays devoted to the theories, methods, and problems of myth criticism

offers a convenient and substantial introduction to one of the most distinctive trends in contemporary literary study. The essays (many of them previously uncollected) are arranged to lead from general considerations to analyses of specific authors. The four Part I selections constitute an informal survey of the views of myth and ritual taken by disciplines other than literature. In Part II the first six essays relate the concept of myth and ritual to general literary theory, while the final three evaluate the uses of myth in critical theory and practice. The twenty-one Part III essays, which apply myth criticism to individual literary works or authors, afford a representative sampling of the mythopoeic patterns discerned in literature from Homer to Faulkner. Among the contributors are: David Bidney, Götz Fronek, Joseph Campbell, Clyde Kluckhohn, Stanley Hyman, Philip Wheelwright, Richard Chase, Harold Watts, Northrop Frye, Andrew Lytle, Philip Rahv, Francis Fergusson, Marvin Magalaner, John Lydenberg, and Harry Slochower.

This authoritative volume reviews the breadth of current scientific knowledge on subjective well-being (SWB): its definition, causes and consequences, measurement, and practical applications that may help people become happier. Leading experts explore the connections between SWB and a range of intrapersonal and interpersonal phenomena, including personality, health, relationship satisfaction, wealth, cognitive processes, emotion regulation, religion, family life, school and work experiences, and culture. Interventions and practices that enhance SWB are examined, with attention to both their benefits and limitations. The concluding chapter from Ed Diener dispels common myths in the field and presents a thoughtful agenda for future research.

Beyond Common Sense Simon and Schuster

Piaget 's influence on psychology has been profound. His pathbreaking investigations and theories of cognitive development have set child psychology moving in entirely new directions. His bold speculations have provided the inspiration for the work of others. His studies have been the subject of many books and countless articles. And, significantly, his influence has spread to other disciplines and is having an ever-growing impact on the general culture at large. Here Jean

Piaget, with the assistance of his long-time collaborator Bärbel Inhelder, offers a definitive presentation of the developmental psychology he has elaborated over the last forty years. This comprehensive synthesis traces each stage of the child's cognitive development, over the entire period of childhood, from infancy to adolescence. Until now, there has only been a shallow understanding of how the leadership actions of project managers interact with ethics and social responsibility. Empirical research into this subject has been sparse. Responsible Leadership, by Nicholas Clarke, Alessia D'Amato, Malcolm Higgs, and Ramesh Vahidi is the first study to investigate how the relationships among managers, team members, and other stakeholders can bring about personal and ethical conflicts that impact decision making. In this groundbreaking book, the authors explore how those who serve as leaders on projects can exercise their roles in ways that respond to the ever-increasing need for ethical decision making. They examine the factors that enable and constrain responsible leadership, looking at the issues faced by project managers as they interact with team members and other stakeholders. Responsible Leadership also provides new insights into how project managers view the moral implications of conflicts that occur as they conduct their work and is a valuable addition to the project management toolkit.
