The late Carl Rogers, founder of the humanistic psychology movement, revolutionized psychotherapy with his concept of "client-centered therapy." His influence has spanned decades, but that influence has become so much a part of mainstream psychology that the ingenious nature of his work has almost been forgotten. A new introduction by Peter Kramer sheds light on the significance of Dr. Rogers's work today. New discoveries in the field of psychopharmacology, especially that of the antidepressant Prozac, have spawned a quick-fix drug revolution that has obscured the psychotherapeutic relationship. As the

pendulum slowly swings back toward an appreciation of the therapeutic encounter, Dr. Rogers's "client-centered therapy" becomes particularly timely and important.

The present book contains the proceedings of two conferences held at the World Computer Congress 2010 in Brisbane, Australia (September 20–23) organised by the International Federation for Information Processing (IFIP). In the first part, the reader can find the proceedings of the 9th Human Choice and Computers International Conference (HCC9) organised by the IFIP Technical Committee TC9 on the Relationship Between ICT and Society. The HCC9 part is subdivided into four tracks: Ethics and ICT Governance, Virtual Technologies and Social Shaping, Surveillance and Privacy, and ICT and Sustainable Development. The second part consists of papers given at the Critical Information Infrastructure Protection Conference (CIP) organized by the IFIP Technical Committee TC11

on Security and Privacy Protection in Information Processing Systems. The two parts of the book are introduced by the respective Conference Chairs. Chapter 1 introduces HCC9, providing a short summary of the HCC conference series, which started in 1974, and explaining the overview of HCC9, detailing the rationale behind each of the tracks in this conference. The details related to the papers of each track are discussed by the Track Chairs in the respective introductions to the specific tracks of HCC9 (Chaps. 2, 10, 16 and 22). Finally, Chap. 22 introduces the CIP part.

The opioid epidemic is responsible for longest sustained decline in U.S. life expectancy since the time of World War I and the Great Influenza. In 2017, nearly 50,000 Americans died from an opioid overdose - with an estimated 2 million more living with opioid addiction every day. *The Opioid Epidemic: What Everyone Needs to Know®* is an accessible, nonpartisan overview of the causes, politics, and treatments tied to the most devastating health crisis of our time. Its comprehensive approach and Q&A format offer readers a practical path to understanding the epidemic from all sides: the basic science of opioids; the nature of addiction; the underlying reasons for the opioid epidemic; effective approaches to helping individuals, families, communities, and national policy; and common myths related to opioid addiction. Written by two expert physicians and enriched with stories from their experiences in the crosshairs of this epidemic, this book is a critical resource for any general reader -- and for the individuals and families fighting this fight in their own lives.

Communication in Autism adopts a multidisciplinary approach to explore one of the most common developmental disorders associated with communication impairment. Perhaps the most fascinating thing about communication in autism is that variation is as extreme as it could possibly be. While some individuals with autism have age-appropriate language, a number have exceptional language skills; others have little or no spoken language. In between these extremes are individuals who experience significant linguistic impairments. These impairments can affect peer relations and literacy skills. The chapters in this volume provide comprehensive coverage of both the theoretical underpinnings and the practical aspects of autistic communication. The result is a volume that showcases the wide range of methodologies being used in this field of research. It is invaluable for scientists, service providers, parents, individuals with autism, and students learning about communication and autism (e.g., in psychology, speech pathology, and education).

The effects of polio that occur decades after the disease has run its course--weakness, fatigue, pain, intolerance to cold, difficulty with breathing and swallowing--are often more devastating than the original disease. This book on the diagnosis and management of polio-related health problems is an essential resource for polio survivors and their families and health care providers. Dr. Julie K. Silver, who has both personal and professional experience with post-polio syndrome, begins the book

by defining and describing PPS and providing a historical overview of its diagnosis and treatment. Chapters that follow discuss finding good medical care, dealing with symptoms, maintaining proper nutrition and weight, preventing osteoporosis and falls, and sustaining mobility. Dr. Silver reviews the latest in braces, shoes, assistive devices, and wheelchairs and scooters. She also explores issues involving managing pain, surgery, complementary and alternative medicine, safe and comfortable living environments, insurance and disability, and sex and intimacy.

NATIONAL BESTSELLER • From the acclaimed Nobel Prize winner—a powerful examination of our obsession with beauty and conformity that asks questions about race, class, and gender with characteristic subtlety and grace.

In Morrison's acclaimed first novel, *Pecola Breedlove*—an 11-year-old Black girl in an America whose love for its blond, blue-eyed children can devastate all others—prays for her eyes to turn blue: so that she will be beautiful, so that people will look at her, so that her world will be different. This is the story of the nightmare at the heart of her yearning, and the tragedy of its fulfillment. Here, Morrison's writing is "so precise, so faithful to speech and so charged with pain and wonder that the novel becomes poetry" (The New York Times).
