Newbery Medal winner Sharon Creech crafts a truly endearing story, one that is imbued with happiness, wonder, and an appreciation for all the little things that make life big. With beautiful, fresh new cover art, this is a gem of a book. In the winding stone tower of the Casa Rosa, in a quiet little village in the Swiss Alps, lives one very unlikely angel—one that is still awaiting her instructions from the angel-training center. What happens to an angel who doesn't know her mission? She floats and swishes from high above, watching the crazy things that "peoples" say and do. But when a zany American girl named Zola arrives in town and invades the Casa Rosa, dogs start arfing, figs start flying through the air, lost orphans wander in, and the village becomes anything but quiet. And as Zola and

the angel work together to rescue the orphans, they each begin to realize their purpose and learn that there is magic in the most ordinary acts of kindness.

Evidence-Based Practices and Treatments for Children with Autism Routledge

Autism spectrum disorders (ASDs) have been increasingly diagnosed in recent years and carries with it far reaching social and financial implications. With this in mind, educators, physicians, and parents are searching for the best practices and most effective treatments. But because the symptoms of ASDs span multiple domains (e.g., communication and language, social, behavioral), successfully meeting the needs of a child with autism can be quite challenging. *Evidence-Based Practices and Treatments for Children with Autism* offers an insightful and balanced perspective on topics ranging from the historical underpinnings of autism treatment to the use of psychopharmacology and the implementation of evidence-based practices (EBPs). An evaluation methodology is also offered to reduce the risks and inconsistencies associated with the varying definitions of key autism terminology. This commitment to clearly addressing the complex issues associated with ASDs continues throughout the volume and provides opportunities for further research. Additional issues addressed include: Behavioral excesses and deficits treatment Communication treatment Social awareness and social skills treatment Dietary, complementary, and alternative treatments Implementation of EBPs in school settings Interventions for sensory dysfunction With its holistic and accessible approach, *Evidence-Based Practices and Treatments for Children with Autism* is a vital resource for school psychologists and special education professionals as well as allied

mental health professionals, including clinical child and developmental psychologists, psychiatrist, pediatricians, primary care and community providers.

Global events of the early twenty-first century have placed new stress on the relationship among anthropology, governance, and war. Facing prolonged insurgency, segments of the

U.S. military have taken a new interest in anthropology, prompting intense ethical and scholarly debate. Inspired by these issues, the essays in *Anthropology and Global Counterinsurgency* consider how anthropologists can, should, and do respond to military overtures, and they articulate anthropological perspectives on global war and power relations. This book investigates the shifting boundaries between military and civil state violence; perceptions and effects of American power around the globe; the history of counterinsurgency doctrine and practice; and debate over culture, knowledge, and conscience in counterinsurgency. These wide-ranging essays shed new light on the fraught world of Pax Americana and on the ethical and political dilemmas faced by anthropologists and military personnel alike when attempting to understand and intervene in our world.
