The History of Christmas Nova Publishers  
This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his

days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

To every member of the 82nd Airborne Division who dropped as part of the American paratroop landings during World War Two, they breathed a little easier knowing their commander "Jumpin' Jim" Gavin would be jumping with them. General Gavin's paratroops drop-landed and fought in Sicily, Normandy on D-Day and during the abortive attempt to capture the Rhine bridges during Operation Market-Garden. He shared the risks of all his men parachuting into enemy territory, often only

armed with his GI issue rifle. His memoirs are an outstanding addition to the literature of the Airborne in World War II.

#### *Achtung-Panzer!* Big Finish Productions

This is the most current textbook in teaching the basic concepts of abstract algebra. The author finds that there are many students who just memorise a theorem without having the ability to apply it to a given problem. Therefore, this is a hands-on manual, where many typical algebraic problems are provided for students to be able to apply the theorems and to actually practice the methods they have learned. Each chapter begins with a statement of a major result in Group and Ring Theory, followed by problems and solutions. Contents: Tools and Major Results of Groups; Problems in Group Theory; Tools and Major Results of Ring Theory; Problems in Ring Theory; Index.

Although it receives much less attention than better known disarmament processes, the destruction of small arms is reshaping the military arsenals of the world. Out of roughly 200 modern military small arms world-wide, about 500,000 are destroyed every year. The commitment of major governments and international organizations makes small arms destruction a permanent addition to the global disarmament repertoire. But the prospects for greater military small arms disarmament may be declining, as war in Afghanistan and Iraq create unprecedented demand for second-hand weaponry. Inconspicuous disarmament of small arms and ammunition is reshaping the global picture of firearms, light weapons and ammunition. The process is far from comprehensive, but much more than cosmetic. Small arms destruction is here to stay, but its contributions may be fleeting. This book is the first full-length examination of the issue. The case studies in this volume examine the politics of military small arms disarmament. When, they ask, is surplus destruction most likely? And what can be done to make

destruction more likely and more effective? Case studies examine small arms destruction by NATO and the OSCE, and in Bulgaria, Cambodia, Germany, Kazakhstan, Papua New Guinea, Romania, Serbia, Ukraine and others. This book was published as a special issue of Contemporary Security Policy. *The Changing Role of the Military in Papua New Guinea* Saskatoon : Wordbooks
