Today, there is a surge of interest
in e-government and its

implementation. Many governments across the world are laying great emphasis on delivering speedy and reliable services to the citizens and businesses through the use of Information Technology and Communication Technology. In India too, particularly in states like Andhra Pradesh and Karnataka, many e-government projects have been successfully implemented, which have immensely benefited the ordinary citizens. The author, with years of practical experience in e-government implementation, gives a masterly analysis of e-government and its benefits, role of people, process and technology in e-government, public-private partnership models, e-government standards, and issues relating to security, digital divide, and cyber law. The 9 Case Studies in the G2B, G2C and G2G segments considerably enhance the value of the book. The theoretical aspects are ably illustrated with the help of diagrams, screenshots, tables and exhibits. All these features, together with the clear exposition of the principles and practice of e-government, should make this book a valuable guide and a cherished companion for all practitioners of e-government in the public sector as also in the IT industry. Besides, students of management would immeasurably benefit by reading this timely, well-balanced and well-researched study.

The 1934 State of the Union Address was given by the 32nd president of the United States, Franklin D. Roosevelt. It was the first State of the Union address to be given in January. Excerpt: "Now that we are definitely in the process of recovery, lines have been rightly drawn between those to whom this recovery means a return to old methods—and the number of these people is small—and those for whom recovery means a reform of many old methods, a permanent readjustment of many of our ways of thinking and therefore of many of our social and economic arrangements... Sustainable development has
always been a contested
concept and has been
extensively debated over the
last 30 years with new
classifications arising since
then. There was a previous
push for the radical
transformations of the market
economy to downscale
production and consumption
that would increase human
well-being and enhance
ecological conditions. Because
of this conflict, there was a
need for a new model that
challenges and could be the
alternative for the liner
economy; this new model is
called the circular economy. A
circular economy aimed at
eliminating waste and the
continual use of resources. It

gained its ground in the era of
disruptive technological
advancement and a dynamic
global value chain. By
supporting resource-efficient
industrial models, the circular
economy preserves and
improves natural capital,
optimizes the value of
resources, and abolishes
negative environmental
externalities such as pollution.
Examining the Intersection of
Circular Economy, Forestry,
and International Trade
explores the link between the
circular economy and various
aspects of the business and
environment to understand the
usage and viability of adapting
the circular economy from a
business perspective. The
chapters highlight the transition
to the circular economy, its
implementation across society,
its intersection with forestry and
international trade, and the
solutions and challenges of the
circular economy. This book is
aimed at researchers in the field
of business management,
economics, and environmental
studies along with practitioners,
stakeholders, researchers,
academicians, and students
looking for more information
on the various fields impacting
the circular economy as well as
the implementation, usage, and
viability of a widespread
adoption of a circular economy.
