This resource book is designed to assist teachers in implementing California's history-social science framework at the 10th grade level. The models support implementation at

the local level and may be used to plan topics and select resources for professional development and preservice education. This document provides a link between the framework's course descriptions and teachers' lesson plans by suggesting substantive resources and instructional strategies to be used in conjunction with textbooks and supplementary materials. The resource book is divided into eight units: (1) "Unresolved Problems of the Modern World"; (2) "Connecting with Past Learnings: The

Rise of Democratic Ideas"; (3) "The Industrial Revolution"; (4) "The Rise of Imperialism and Colonialism: A Case Study of India"; (5) "World War I and Its Consequences"; (6) "Totalitarianism in the Modern World: Nazi Germany and Stalinist Russia"; (7) "World War II: Its Causes and Consequences"; and (8) "Nationalism in the Contemporary World." Each unit contains references. (EH)

First published in paperback by UNM Press in 1976, The Way to Rainy

Mountain has sold over 200,000 copies. "The paperback edition of *The Way to Rainy Mountain* was first published twenty-five years ago. One should not be surprised, I suppose, that it has remained vital, and immediate, for that is the nature of story. And this is particularly true of the oral tradition, which exists in a dimension of timelessness. I was first told these stories by my father when I was a child. I do not know how long they had existed before I heard them. They seem to proceed from a place of origin as old as the earth. "The stories in *The Way to Rainy Mountain* are told in three voices. The first voice is the voice of my father, the ancestral voice, and the voice of the Kiowa

oral tradition. The second is the voice of historical commentary. And the third is that of personal reminiscence, my own voice. There is a turning and returning of myth, history, and memoir throughout, a narrative wheel that is as sacred as language itself."--from the new Preface

The Apex Book of World SF, edited by Lavie Tidhar, features award-winning science fiction and fantasy short stories from Asia, Eastern Europe and around the world. The world of speculative fiction

is expansive; it covers more than one country, one continent, one culture. Collected here are sixteen stories penned by authors from Thailand, the Philippines, China, Israel, Pakistan, Serbia, Croatia, Malaysia, and other countries across the globe. Each one tells a tale breathtakingly vast and varied, whether caught in the ghosts of the past or entangled in a postmodern age. Among the spirits, technology, and deep recesses of the human mind, stories abound. Kites sail

Anne Langton. Reviews: "From S.P. Somtow's World Fantasy Award-winning "The Bird Catcher," a restrained horror tale of a young boy's friendship with Thailand's most infamous human "monster," to "Wizard World," Galaxy Award winner Yang Ping's story of high-tech gamers, this extraordinary anthology of 16 tales introduces English-speaking readers to some of the world's best writers of sf, horror, fantasy,

and metafiction. Contributors include Jamil Nasir (Palestine), Aleksandar Ziljak (Croatia), Guy Hasson (Israel), Kaaron Warren (Australia/Fiji), and Jetse de Vries (Netherlands). VERDICT This literary window into the international world of imaginative fiction, the first in a new series, is sure to appeal to adventurous sf fans and readers of fiction in translation." —Library Journal "The great thing about Tidhar's collection is that it is full of such

masterpieces. You do have to get used to having your mind warped as if by some powerful psychedelic. You'll definitely feel that way after Zoran Zivkovic and his Godot-like explorations. Or after Guy Hassan's thought experiment about the nature of mind and thought. But once you get used to the idea, you can settle in and enjoy the ride." —42SciFi-Fantasy.com, Randy Lazarus "These stories deserve to be heard!" —Frederik Pohl The Lanahan

Readings in the American Polity Exploring Science 4 Data Mining: Concepts and Techniques provides the concepts and techniques in processing gathered data or information, which will be used in various applications. Specifically, it explains data mining and the tools used in discovering knowledge from the collected data. This book is referred as the knowledge discovery from data (KDD). It focuses on the feasibility, usefulness, effectiveness, and scalability of techniques of large

data sets. After describing data mining, this edition explains the methods of knowing, preprocessing, processing, and warehousing data. It then presents information about data warehouses, online analytical processing (OLAP), and data cube technology. Then, the methods involved in mining frequent patterns, associations, and correlations for large data sets are described. The book details the methods for data classification and introduces the concepts and methods for data clustering. The remaining chapters

discuss the outlier detection and the trends, applications, and research frontiers in data mining. This book is intended for Computer Science students, application developers, business professionals, and researchers who seek information on data mining. Presents dozens of algorithms and implementation examples, all in pseudo-code and suitable for use in real-world, large-scale data mining projects Addresses advanced topics such as mining object-relational databases, spatial databases, multimedia databases, time-

series databases, text databases, the World Wide Web, and applications in several fields Provides a comprehensive, practical look at the concepts and techniques you need to get the most out of your data

Leave time for wonder. Walt Whitman's "When I Heard the Learn'd Astronomer" is an enduring celebration of the imagination. Here, Whitman's wise words are beautifully recast by New York Times #1 best-selling illustrator Loren Long to tell the story of a boy's fascination with the heavens. Toy rocket in hand, the boy finds himself in a crowded, stuffy lecture hall. At first he is amazed by the charts and the figures. But when he finds himself overwhelmed by the pontifications of an academic, he retreats to the great outdoors and does something as universal as the stars themselves... he dreams.

Historically, grief and spirituality have been jealously guarded as uniquely human experiences. Although non-human animal grief has been acknowledged in recent times, its potency has not been recognised as equal to human grief. Anthropocentric philosophical questions still underpin both academic and popular discussions. In *Enter the Animal*, Teya Brooks

Pribac examines what we do and don't know about grief and spirituality. She explores the growing body of knowledge about attachment and loss and how they shape the lives of both human and non-human animals. A valuable addition to the vibrant interdisciplinary conversation about animal subjectivity, *Enter the Animal* identifies conceptual and methodological approaches that have contributed to the prejudice against nonhuman animals. It offers a
