Examine microeconomic theory as a way of looking at the world as MICROECONOMICS: AN INTUITIVE APPROACH WITH CALCULUS, 2E builds on the basic economic foundation of individual behavior. Each chapter contains two sections. The A sections introduce concepts using intuition, conversational writing, everyday examples, and graphs with a focus on mathematical counterparts. The B sections then cover the same concepts with precise, accessible mathematical analyses that assume one semester of single-variable calculus. The

This is not a traditional encyclopedic text filled with technical details. Rather it is a modern, "back-to-basics" book written expressly to promote economic literacy and engage students in learning about how economics affects them as citizens in our society. Coupled with pedagogical innovations that are well-grounded in learning theory research, the text's visually effective design and captivating content inspires students to actually read the chapters. It succeeds like no other text in taking the intimidation out of economics and in meeting its goal of explaining the material in a manner that will

"bring students the same feeling of excitement and relevance" the author felt when taking his first economics class.

The Eleventh Edition of this market-leading text continues its tradition of providing a solid foundation of economic understanding for use in managerial decision making. It offers a practical treatment of economic theory and analysis in an intuitive, calculus-based format. Its focus is on presenting those aspects of economic theory and analysis that are most relevant to students of business administration, and a wide variety of examples and simple numerical problems are used to illustrate the application of managerial economics to a vast assortment of practical situations. The nature of the decision process and the role that economic analysis plays in that process are emphasized throughout. This major revision is designed to maximize accessibility for a student audience with little or no background in economics, and no previous training in calculus.
