Clinical Practice Guidelines (CPGs) are to the greatest extent possible evidence-based. The guidelines are developed using a rigorous process that involves subject matter experts in each field evaluating the best available data. If you are interested in learning more about the process of developing CPGs, please click this link: [CPG Development Process](#). This guide for CPG development will help lead you through the methods used to develop and monitor CPGs. The JTS remains

committed to using the highest levels of analytical and statistical analysis in its CPG development process. Circular Economy (CE) is
considered as one of the
important strategies in addressing
Sustainable Development Goals.
Practicing Circular Economy
provides an overview of CE,

covering its evolution, describing
the key concepts, programs,
policies, and regulations. It
illustrates several business
opportunities over a hundred
hand-picked case studies that
encompass numerous sectors,
various scales of operations and
geographies. Another unique
feature of the book is the activities
listed in each chapter to invoke
thoughts, frame assignments, and
generate discussions. Each
chapter lists key additional
reading materials and takeaways.
Aimed at mid- and senior-level
managers, policy makers,
investors, entrepreneurs,
consultants, researchers,
professors, and academic students
involved in the subject of
environmental management and
sustainability, this book:
Introduces the evolution of CE to
clarify the key concepts and
introduce some of the important
global programs and initiatives
CE economy with case studies
Gives a global overview of
adoption of CE covering
countries such as India, Japan,
Korea, China, EU, North
America, Australia, and several

more Includes information on methodologies followed, tools, and knowledge resources for practicing CE Provides insight to the business models with numerous case studies covering product design, manufacturing, and services and the role of innovation and financing Presents a comprehensive overview of opportunities in CE in sectors such as textile, steel, agriculture, and food Covers newly emerging paradigms of CE such as regional circular economy, circular supply chains, and sustainable procurement and impact of the COVID-19 pandemic on CE Practicing Circular Economy is thus an important resource for every circular economy practitioner and especially to those who aspire to make a career in circular economy.
